**Teach Your Child to Talk** Norman Collins, Gloria O'Betts, Gary Gill, Gordon Czuchna, Michael Stahl, 2011-03-10 Our world is a talking world Effective speaking may be the most important skill your child will learn The problem is that many of us have become so accustomed to speaking and listening that we take them both for granted Consequently many parents assume that their children will somehow learn to talk without any help We say to ourselves I learned to talk by myself and they will too The truth of the matter is that learning to talk doesn t always just happen It is no sudden miracle of good luck Most children will not need any special attention to learn to talk while others might require more help to guarantee that their language skills will develop to their maximum The quality of children s speech and language skills is directly related to the things that happen to them during their preschool years Someone must provide meaningful situations that will help children use and understand their language Parents are the logical people to accept this responsibility to assure the quality of their child s speech and language skills Language abilities will be needed once your child enters school since three fourths of classroom time is spent in speaking or listening The activities in this book will do much to help any child prepare for those school activities These recommendations will be of greatest value to your child if both parents take time to use them The experienced authors who wrote this handbook have attempted to advise and inspire you I for one plan to follow their guidelines As a speech specialist I know they work As a new parent myself I have a two month old daughter waiting for me to teach her to talk The welcome use of this book will help us both to enjoy it L E Miner Department of Speech Pathology and Audiology Eastern Illinois University Charleston Illinois
