Is our education system truly preparing students for the future or is it simply mass producing workers trapped in outdated frameworks For centuries India's education system was rooted in wisdom inquiry and holistic learning The Gurukul model nurtured critical thinking self awareness and deep intellectual exploration But colonial rule replaced it with a rigid factory like system one that rewards memorization over mastery compliance over curiosity and information over true understanding Now in the age of Artificial Intelligence where machines can store analyze and create faster than ever the question becomes urgent what is the real purpose of education If knowledge is no longer exclusive to human minds what must we teach and how In *Reclaiming Wisdom Transforming Education for a Conscious Future* Aindrila Ghosal an educator with 15 years of experience across teaching counseling and academic leadership examines why modern education is failing and how we can revive learning through India's ancient intellectual traditions Drawing from the philosophies of Swami Vivekananda Rabindranath Tagore and G I Gurdjieff she argues that education must go beyond rote learning and career preparation it must be a path to awakening the whole individual This book is a call to action for teachers parents and changemakers If education is to remain relevant in an AI driven world we must reclaim the depth of our traditions rethink the way we teach and redefine what it truly means to learn      *Sleep and Learn* David Curtis, 1963      *History of Indigenous Education in the Panjab Since Annexation and in 1882* Gottlieb William Leitner, 1883      *Sleep and cognition in the elderly* Géraldine Rauchs, Julie Carrier, Philippe Peigneux, 2015-05-26
