Charlotte Kenton,1983 ADHD and Fetal Alcohol Spectrum Disorders (FASD) Kieran D. O'Malley,2007 This multi author book will discuss the history and clinical presentation of Foetal Alcohol Spectrum Disorders FASD i e Fetal Alcohol Syndrome FAS and Alcohol Related Neurodevelopmental Disorder ARND These developmental neuropsychiatric disorders result from prenatal exposure to alcohol during any gestational period of pregnancy The book will particularly address the co occurring presence of ADHD in patients with FASD ADHD is the most frequent neuropsychiatric presentation of FASD throughout the lifespan and it is particularly difficult to manage because the underlying pathophysiology is related to prenatal neurotoxic brain injury Although prenatal alcohol exposure and the resulting FASD is recognised as the commonest preventable cause of intellectual disability many clinicians and educators are not aware that 75 to 80% of the patients with FASD have I Q s over 70 Thus the neuropsychiatric presentation of FASD can often be unrecognised or misunderstood FASD are the true clinical masqueraders and ADHD is their most likely disguise The authors are all experienced professionals from a wide range of disciplines working throughout the USA and Canada They have been involved in the diagnosis research and management of FASD for many years and this book will bring their collective knowledge regarding management from infancy to adulthood to an inter professional audience *Fetal Alcohol Syndrome* Ernest L. Abel,1981 The Effects of Maternal Alcohol and Drug Abuse on the Newborn Barry Stimmel,1982 Drug abuse and alcoholism specialists present the latest findings on the effects on the newborn of mothers use of illicit drugs during pregnancy These experts specifically address the perinatal neonatal and subsequent developmental effects *New Literature on Fetal Alcohol Exposure and Effects* ,1990-01-16 Abstract This bibliography is a supplement to a bibliography on fetal alcohol exposure published in 1985 The present bibliography was prompted by new developments in this area including legislation requiring warning labels on alcoholic beverages stating that drinking during pregnancy may result in birth defects The 1 818 citations in this volume cover the years 1983 1988 and are arranged alphabetically by author with a subject index Items cited include books collected papers journal articles and dissertations *Compendium of Resource Materials, Fetal Alcohol Spectrum Disorders (FASD)* ,2004 **Preventing Fetal Alcohol Effects** ,1981 Abstract A practical guide offers information designed to assist health care professionals in identifying alcohol abuse in ob gyn patients Topics include problems in diagnosing alcohol abuse general guidelines for assessing patient history and actions to take when maternal alcohol abuse is suspected A screening checklist for identifying alcohol abusing ob gyn patients is appended The guide is introduced by the US Surgeon General s Advisory on Alcohol and Pregnancy which was prompted by recent research findings demonstrating that alcohol consumption during pregnancy can harm the developing fetus *Alcohol Health and Research World* ,1995 *Understanding Fetal Alcohol Spectrum Disorder* Maria Catterick,Liam Curran,2014-08-28 This is the essential guide to FASD the most common non genetic learning disability

which is caused by alcohol consumption during pregnancy It explains how FASD affects individuals at different stages of their lives how you can identify it and gives advice on how to support children young people and adults with FASD The Eye in Systemic Disease Daniel H. Boehm, Mary Haire, 1990 **Alcohol and Health** U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES, 1987 **Moral Judgment and Reasoning in Children and Adolescents with Prenatal Alcohol Exposure** Amy Michele Goodman Schonfeld, 2002 Prenatal exposure to alcohol is associated with a variety of cognitive behavioral and social deficits including delinquent behaviors Individuals exposed to alcohol prenatally both with and without fetal alcohol syndrome FAS have similar deficits in these functional areas It is well documented that delinquent populations and those with intellectual and behavioral deficits exhibit impaired moral judgment and reasoning but this area remains unexplored in alcohol exposed individuals For these reasons children and adolescents with ALC and without CON prenatal alcohol exposure were evaluated on measures of moral judgment and reasoning and delinquency Results revealed that while those in the ALC group performed at a lower level of moral maturity than the CON group the difference was not significant In addition Verbal IQ primarily accounted for this difference However there was suggestion that a deficit on the value judgment having to do with relationships with others i e Affiliation is specific to prenatal alcohol exposure As predicted delinquency was higher for those in the ALC group but contrary to expectations moral maturity did not predict delinquent behavior In the CON group only as the age of the subjects increased more delinquent behaviors were endorsed For the ALC group socially desirable responding predicted delinquent behavior suggesting under endorsement of such behavior A measure of inhibition did not predict delinquency or moral maturity beyond control measures Finally significantly more children and adolescents with heavy prenatal alcohol exposure but without FAS met criteria for Conduct Disorder CD The results of this study suggest that those with prenatal alcohol exposure are at a lower developmental level with respect to their moral reasoning about their affiliation with others In addition alcohol exposed individuals specifically those without a diagnosis of FAS are at higher risk for delinquency particularly Conduct Disorder The implications of this study are twofold First the findings indicate that children and adolescents with prenatal alcohol exposure will benefit from social skills training in light of their continued deficits in interpersonal relations Second interventions aimed at their delinquent tendencies is warranted however targeting moral judgment for this purpose in such an intervention may not yield additional benefit
