Iterative Computer Algorithms With Applications In Engineering Solving Combinatorial Optimization Problems:

Iterative Computer Algorithms with Applications in Engineering Sadiq M. Sait, Habib Youssef, 1999 The book includes an introduction to fuzzy logic and its application in the formulation of multi objective optimization problems a discussion on hybrid techniques that combine features of heuristics a survey of recent research work and examples that illustrate required mathematical concepts **BOOK JACKET** *Evolutionary Algorithms for Solving Multi-Objective Problems* Carlos Coello Coello, Gary B. Lamont, David A. van Veldhuizen, 2007-08-26 Solving multi objective problems is an evolving effort and computer science and other related disciplines have given rise to many powerful deterministic and stochastic techniques for addressing these large dimensional optimization problems Evolutionary algorithms are one such generic stochastic approach that has proven to be successful and widely applicable in solving both single objective and multi objective problems This textbook is a second edition of *Evolutionary Algorithms for Solving Multi Objective Problems* significantly expanded and adapted for the classroom The various features of multi objective evolutionary algorithms are presented here in an innovative and student friendly fashion incorporating state of the art research The book disseminates the application of evolutionary algorithm techniques to a variety of practical problems including test suites with associated performance based on a variety of appropriate metrics as well as serial and parallel algorithm implementations *Applied Soft Computing Technologies: The Challenge of Complexity* Ajith Abraham, Bernard de Baets, Mario Köppen, Bertram Nickolay, 2006-08-11 This volume presents the proceedings of the 9th Online World Conference on Soft Computing in Industrial Applications held on the World Wide Web in 2004 It includes lectures original papers and tutorials presented during the conference The book brings together outstanding research and developments in soft computing including evolutionary computation fuzzy logic neural networks and their fusion and its applications in science and technology
