**Biodiversity Conservation** Charles Perrings, 1994 Eighteen papers report the more policy oriented results of the Biodiversity Programme of the Beijer International Institute of Ecological Economics of the Royal Swedish Academy of Sciences The Programme brought together economists and ecologists to consider where the problem in biodiversity loss really lies what costs it has for society and how it might best be addressed The results show that the problem of biodiversity loss lies less in the erosion of the genetic library than in the effect it has on the range of environmental conditions under which ecosystems can continue to function that loss of biodiversity implies loss of ecosystem resilience and thus poses problems for policy wherever it occurs and that solutions should be sought more in reform of local institutions and local policies than in international institutions and transfer systems established to address the threat to the global genetic library Annotation copyright by Book News Inc Portland OR *Rangeland Wildlife* Paul R. Krausman, 1996

*Forest Ecology* J. P. Kimmins, 1997 Forest Ecology uses an ecosystem approach to understanding the ecology of forests It examines the form and function of forest ecosystems and how they change over time in response to natural and human caused disturbances A complete treatment of the ecosystem including all the major structural components and functional processes of the forest ecosystem This book examines forest ecology in the context of sustainable development and population growth Gives equal emphasis to ecosystem function the physical environment the biotic processes population and community ecology and ecosystem change overtime
