AIR CRASH INVESTIGATIONS, CAPTAIN LOST CONTROL The Crash of Kenya Airways Flight 507 Hank Williamson, editor, 2012-07-01 During the night of 04th May 2007 the B737 800 registration 5Y KYA operated by Kenya Airways as flight KQA 507 from Abidjan international airport C te d Ivoire to the Jomo Kenyatta airport Nairobi Kenya made a scheduled stop over at the Douala international airport Cameroon The weather was stormy A number of departing planes decided to wait for the weather to improve Kenya Airways however decided to depart Shortly after take off at about 1000 ft the aircraft entered into a slow right roll that increased continuously and eventually ended up in a spiral dive On the 5th May 2007 at approximately 0008 hrs the airplane crashed in a mangrove swamp South South East of Douala All 114 people on board were killed and the airplane was completely destroyed The airplane crashed after loss of control by the crew as a result of spatial disorientation after a long slow roll during which no instrument scanning was done and in the absence of external visual references in a dark night

Ernsting's Aviation and Space Medicine David P. Gradwell, Elizabeth S. Wilkinson, 2025-05-30 Ernsting s Aviation and Space Medicine applies current understanding in medicine physiology and the behavioural sciences to the medical challenges and stresses that are faced by both civil and military aircrew and their passengers on a daily basis The sixth edition of this established textbook and clinical reference has been revised and updated by a multidisciplinary team of experienced contributors many new to this edition The structure of the book has been refined

bringing related chapters together where appropriate while the clinical content has been carefully streamlined in line with the specific requirements of the aviation medicine practitioner and adviser with new chapters added on Commercial Space Travel Skin Disease and Women's Health Key Features Convenient embraces all aspects of aviation medicine in a single volume divided into four parts for ease of reference Aviation Physiology Aircrew Systems Space Physiology Medicine Clinical Aviation Medicine and Operational Aviation Medicine Comprehensive covers all forms of military and passenger carrying aircraft including issues surrounding passenger safety and transport of the sick and injured Aids detailed understanding focuses on the principles underlying the standards in the field rather than just the standards themselves Applicable worldwide addresses international issues including worldwide regulation of medical standards and travel and disease Accessible chapter summaries enable rapid assimilation of key points while key references and suggestions for further reading encourage in depth learning eBook included text fully online and searchable via VitalSource eBook The text remains the recommended coursebook for those studying for the Diploma in Aviation Medicine of the Faculty of Occupational Medicine of the Royal College of Physicians recognized worldwide as an exemplary standard in the field and for similar worldwide qualifications It is an essential companion for all civil and military aviation medicine practitioners both when preparing for professional examinations and in daily practice and for those in the many disciplines of the behavioural and life sciences that include some study of aviation its physiology and related issues It is also recommended reading for those with a wider interest in the medical problems of professional or recreational flying air transport and the aviation industry

Airways, 2007 **The Multitasking Myth** Dr Immanuel Barshi, Dr Loukia D Loukopoulos, Dr R Key

Dismukes, 2012-10-01 Despite growing concern with the effects of concurrent task demands on human performance and research demonstrating that these demands are associated with vulnerability to error so far there has been only limited research into the nature and range of concurrent task demands in real world settings This book presents a set of NASA studies that characterize the nature of concurrent task demands confronting airline flight crews in routine operations as opposed to emergency situations The authors analyze these demands in light of what is known about cognitive processes particularly those of attention and memory with the focus upon inadvertent omissions of intended actions by skilled pilots The studies reported within the book employed several distinct but complementary methods ethnographic observations analysis of incident reports submitted by pilots and cognitive task analysis They showed that concurrent task management comprises a set of issues distinct from though related to mental workload an area that has been studied extensively by human factors researchers for more than 30 years This book will be of direct relevance to aviation psychologists and to those involved in aviation training and operations It will also interest individuals in any domain that involves concurrent task demands for example the work of emergency room medical teams Furthermore the countermeasures presented in the final chapter to reduce vulnerability to errors associated with concurrent task demands can readily be adapted to work in diverse
