

A stylized, high-contrast illustration of a landscape. The sky is light blue with a few white clouds and a small airplane in the upper left. The background features rolling hills in shades of blue and green, with a small red building and a plume of smoke in the distance. In the middle ground, there are several large, white, three-bladed wind turbines and tall, grey electricity pylons with power lines. The foreground is dominated by a bright yellow field with dark green patches, suggesting a mix of crops or fields. A winding road or path in shades of purple and blue leads from the bottom right towards the center. In the bottom left corner, the front of a red car is visible. In the bottom right corner, a small figure of a person is walking along the path.

Behind The Green English Edition:

Beyond the Green Myth Peter G. Sercombe, Bernard Sellato, 2008-03-18 Borneo with its tales of White Rajahs and tribes of headhunters has long excited the Western imagination Today however there is another green imagination at work Mention of the island is more likely to evoke images of tropical deforestation and concern about the cruel dispossession and displacement of indigenous peoples who once lived in relative harmony with their environment It is perhaps not suprising then that most books dealing with the nomadic hunter gatherers of Borneo have principally been pictorial studies There is indeed a dearth of scholarship regarding these peoples a situation that this first ever comprehensive review of nomadic groups in the Borneo rain forest aims to rectify Presenting a wealth of new research contributed by an international team of scholars the volume covers all of those parts of Borneo where nomads called Penan Punan or by various other names are or were known to exist and provides a comparative historical ecological study of these groups The study is primarily concerned with issues of modernization including the monetary economy formalized institutions centralized power structures contractual relationships and extraction activities and development policies The impact of these policies is analyzed with special regard to the natural environment inhabited by these small scale societies as well as the use of its resources The book has no stiff theoretical orientation but informs ongoing debates about changing forms of ethnicity relations between minorities and the state minorities rights and survival native discourse the sustainability of tropical forest use and the neo romantic environmentalist myth of so called wise traditional peoples
