sometimes daunting effect of being an assertive woman in this day and age Handbook of Gender Research in Psychology
Joan C. Chrisler, Donald R. McCreary, 2010-03-12 Donald R McCreary and Joan C Chrisler The Development of Gender
Studies in Psychology Studies of sex differences are as old as the eld of psychology and they have been conducted in every
sub eld of the discipline There are probably many reasons for the popularity of these studies but three reasons seem to be
most prominent First social psychological studies of person perception show that sex is especially salient in social groups It is
the rst thing people notice about others and it is one of the things we remember best Fiske Haslam Stangor Lynch Duan
Glass 1992 For example people may not remember who uttered a witty remark but they are likely to remember whether the
quip came from a woman or a man Second many people hold rm beliefs that aspects of physiology suit men and women for
particular social roles Men s greater upper body strength makes them better candidates for manual labor and their greater
height gives the impression that they would make good leaders i e people we look up to Women s reproductive capacity and
the caretaking tasks e g breastfeeding baby minding that accompany it make them seem suitable for other roles that require
gentleness and nurturance Third the logic that underlies hypothesis testing in the sciences is focused on difference
Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ

Assertiveness in the Workplace Connie Atristain-Suárez, Susana Castaños-Cervantes, 2025-08-11 This timely work
delves into the intricacies of assertiveness and its profound impact on personal and business competitiveness within the
context of emerging and developing countries *Assertiveness for Woman* G S Hansen, 2020-10-28 If you re not sure what
the word actually means I ll describe assertiveness to give you a better understanding of how to integrate it into your
character Assertiveness is about being self confident You are wholeheartedly embracing yourself and knowing that what
makes you different is what makes you attractive Most women are trying to make themselves better which is not a bad thing
This is when these women shine in tandem with assertiveness This is because only those who try to drag them down are
raising their positive traits and ignoring people Women sometimes find themselves in fierce arguments The views and
opinions of people sometimes come into conflict and create drama These conversations may now and then lead to more
complicated situations Knowing how to be assertive in a nice way can prevent the blowing up of an argument and can even
help one win an argument Learning how to be an assertive woman consists of two things one a tendency toward a positive
attitude and the other a tendency toward daring Assertiveness means you are bold enough to allow your views and opinions
to be heard A positive outlook also goes hand in hand with the assertiveness of an assertive woman She talks with a positive
attitude in spite of a subject that may be about negative things The explanation for this is because a person with a negative
attitude runs the risk of losing his or her control and may say things that might either later be regretted or may not support
the merits of the claim Be sure to think about the words you re using carefully and don t just ramble on More words are not a
sign of affirmation This won t help you win the person you re speaking to and could be considered rude An assertive person is

not one who tries to find a balance between passivity and aggressively but is a completely different idea This simply means you re not going to be bullied to compromise your convictions or ideals when you re in a debate It means you re going to stand up to your ground To expose the truth you carry it conveys every thought and every word with grace and elegance It means that there is no need to belittle or threaten but because you have the power of truth on your hand it is yours to possess beauty elegance and poise Look at it from the point of view of another person Be sure that you were careful about your reality You should back up the things you want to say Know the counter arguments that may come beforehand if possible and be willing to respond to them Look at it from a different person s perspective Step into their shoes and try to figure out why their place is being taken This can encourage you to see holes in the other person s argument or may cause you to change your own mind if that is what the reality dictates The issue of assertiveness as a matter of great importance It is a matter of an inner and outer sense of power or lack of power over one s own life and path Assertiveness is largely the realization that you are in control of what you are or are not going to do but not in control of what others are or are not going to do Passive people tend not to have power over what they are doing whereas aggressive people tend to try to regulate what everyone is doing and in sometimes contradictory ways passive aggressive people switch between the two Assertiveness means simply sticking to yourself your time power money work and ideas Assertiveness strikes a happy balance between passivity and aggressiveness helping you to govern your destiny without competing with others
