Bingen, 2016-12-31 Paramount City of Dreams brings to life the operations of the world's grandest movie lot as never before by opening its famous gates and revealing for the first time the wonderful myriad of soundstages and outdoor sets where for one hundred years Paramount has produced the world's most famous films. With hundreds and hundreds of rare and unpublished photographs in color and black and white readers are launched aboard a fun and entertaining virtual tour of Hollywood's first most famous and most mysterious motion picture studio. Paramount is a self-contained city. But unlike any community in the real world this city's streets and lawns its bungalows and backlots will be familiar even to those who have never been there. Now for the first time these much filmed much haunted acres will be explored and the mysteries and myths peeled away bringing into focus the greatest of all of Hollywood's legendary dream factories **Proceedings of the**

A Grammar of Igala Ejeba, Salem Ochala, 2017-01-17 The book establishes 28 phonemic consonants and 7 vowels as well as lexical and grammatical tones in Igala. It shows the canonical syllable types as V and CV with no complexity and relates resyllabification to the retiming of segments as tone bearing units and the duration of their mora. The work discusses nine word classes as well as ideophones and clitics in Igala. There are splitting verbs of various structures and fully fledged pronouns with morphologically toneless clitic counterparts that are toned in their syntactic context among other elements of the Igala morphology. The work establishes clitics as generally bearing the grammatical tones of various categories as a

result of their morphological tonelessness and their availability for post lexical tone assignment It also accounts for the generally complex interaction of clitics and tones in the organisation of the morphosyntax and the tone syntax interface Igala has both verbal and nominal extensional affixes with various semantic features Some interesting discussions in the Igala syntax include the structural and functional types of serial verb constructions the detransitivizing process of verb movement in object demoting structures coreferentiality in relativised constituents and the future non future temporal distinction Complementary binominals are conjoined with a specified binominal morpheme and their rigidly irreversible structures have implications in the Igala semantics The binominals demonstrate a grammatically specified pattern defined over a conceptual space showing the network among conceptual categories such as kinship marital social hunter hunted more less and cause effect relationships as reflected in the Igala grammar
