The Basic Neurology Of Speech:

The Basic Neurology of Speech Michael Lucien Ernest Espir, Frank Clifford Rose, 1970
The Basic Neurology of Speech and Language Michael Lucien Ernest Espir, Frank Clifford Rose, 1983-01-01
Neurology for the Speech-Language Pathologist Russell J. Love, Wanda G. Webb, 2013-10-22
Neurology for the Speech Language Pathologist presents the fundamentals in understanding the nervous system in the context of communication. The book takes into consideration the nervous anatomic systems such as sensory pathways. The text first introduces the speech language neurology and then proceeds to discussing the organization and neural function of the nervous system. Next, the book relates the nervous anatomic systems to language, speech, and hearing. The text also covers clinical speech syndromes and disorders. The book will be most useful to speech pathologists and therapists. Neurologists and neurosurgeons will also greatly benefit from the text.

The Basic Neurology of Speech M. L. Espir, F. Clifford Rose, 1976-01-01
Concise Encyclopedia of Brain and Language Harry A. Whitaker, 2010-04-08
This volume describes in up-to-date terminology and authoritative interpretation the field of neurolinguistics, the science concerned with the neural mechanisms underlying the comprehension, production, and abstract knowledge of spoken, signed, or written language. An edited anthology of 165 articles from the award-winning *Encyclopedia of Language and Linguistics* 2nd edition, *Encyclopedia of Neuroscience* 4th Edition, and *Encyclopedia of the Neurological Sciences and Neurological Disorders*, it provides the most comprehensive one-volume reference solution for scientists working with language and the brain ever published. Authoritative review of this dynamic field placed in an interdisciplinary context. Approximately 165 articles by leaders in the field. Compact and affordable single-volume format.

Formulaic Language Roberta Corrigan, Edith A. Moravcsik, Hamid Ouali, Kathleen Wheatley, 2009-05-20
This book is the second of the two-volume collection of papers on formulaic language. The collection is among the first in the field. The authors of the papers in this volume represent a diverse group of international scholars in linguistics and psychology. The language data analyzed come from a variety of languages including Arabic, Japanese, Polish, and Spanish and include analyses of styles and genres within these languages. While the first volume focuses on the very definition of linguistic formulae and on their grammatical, semantic, stylistic, and historical aspects, the second volume explores how formulae are acquired and lost by speakers of a language, in what way they are psychologically real, and what their functions in discourse are. Since most of the papers are readily accessible to readers with only basic familiarity with linguistics, the book may be used in courses on discourse, structure, pragmatics, semantics, language acquisition, and syntax, as well as being a resource in linguistic research.

Neuroimaging of Affective Empathy and Emotional Communication Argye E. Hillis, Katherine P. Rankin, 2019-02-08
A recent explosion of research both with neurotypical adults and individuals with brain lesions has been devoted to delineating the auditory, cognitive, and motor processes underpinning affective empathy and emotional communication. This Research Topic highlights this line of investigation by bringing together a methodologically diverse range of neuroimaging studies that

further advance our knowledge of the precise neural mechanisms by which these critical aspects of human interaction are accomplished how they break down after brain damage and how they recover laying the groundwork for developing effective interventions for people with deficits in these functions
