Social Inequality Stratification And Mobility:

Social Inequality, Stratification, and Mobility Judah Matras, 1975 **Research in Social Stratification and Mobility** Kevin T Leicht, 2005-06-04 Research in Social Stratification and Mobility continues its tradition of publishing the best and most innovative research on the changing landscape of social inequality the world over This issue focuses on different dimensions of social closure and their relationship to social inequality processes including the changing role that education plays in sorting people into favorable and unfavorable labor market positions across a global diversity of cultural settings This issue also examines the fluid boundaries of race and ethnicity in contentious political settings relationships between attitudes and collective action and the role that technology and political context plays in promoting economic development and well being These topics and the research methodologies they represent display the vitality of social science research dealing with social stratification and the wide array of methods contexts and policies that directly affect the life chances of most of the world's peoples This issue also marks a continuation of the ties developed between RSSM and the Social Stratification and Mobility section of the International Sociological Association RC 28 This collaboration promises to promote and disseminate social inequality research throughout the world through an established network of distinguished international contributors and commentators The Shape of Social Inequality David Bills, 2005-08-24 This volume brings together former students colleagues and others influenced by the sociological scholarship of Archibald O Haller to celebrate Haller's many contributions to theory and research on social stratification and mobility All of the chapters respond to Haller's programmatic agenda for stratification research A full program aimed at understanding stratification requires first that we know what stratification structures consist of and how they may vary second that we identify the individual and collective consequences of the different states and rates of change of such structures and third seeing that some degree of stratification seems to be present everywhere that we identify the factors that make stratification structures change The contributors to this Festschrift address such topics as the changing nature of stratification regimes the enduring significance of class analysis the stratifying dimensions of race ethnicity and gender and the interplay between educational systems and labor market outcomes Many of the chapters adopt an explicitly cross societal comparative perspective on processes and consequences of social stratification The volume offers both conceptually and empirically important new analyses of the shape of social stratification **Social Inequality, Stratification, and Social Mobility** Judah Matras, 1984 *Social Inequality Across the Generations* Jani Erola, Elina Kilpi, 2017 Social Inequality Across the Generations provides an innovative perspective on social stratification studies by advancing the theoretical and empirical case for the influence of resource compensation It examines whether resource compensation is a successful mechanism for social mobility contrasting it against competing types of resource accumulation such as multiplication So this book is the first to extensively cover the role of compensation in intergenerational attainment a new and rapidly spreading concept in stratification research The editors

bring together research on different types of resources contributing to social mobility from the nuclear family extended family and society including in depth analysis of the influence of wider family members in three different contexts and specific empirical chapters covering European and US societies The authors cover a variety of institutional systems that achieve similar results through contrasting methods and this conceptual framework reveals which policies have the biggest effect on social mobility The book offers original insight into intergenerational inequality and mobility for researchers and students of social stratification research and social mobility particularly within sociology social policy and economics
