## The Attic Pyxis:

The Attic Pyxis Sally Rutherford Roberts, 1978      1996, □□□ □□□□□      **Kylichnis, the Attic Pyxis** Sally Rutherford Roberts, 1970      **The Attic Geometric Pyxis** Barbara Bohen, 1979      The Attic Geometric Pyxis Barbara Elizabeth Bohen, 1983      The Shape of the Attic Red-figured Pyxis, Type A. Sally Rutherford Roberts, 1959      **The Late Geometric and Early Archaic North-Eastern Aegean** Petya Velichkova Ilieva, 2023-12-31 The book focuses on the archaeology of the Late Geometric and Early Archaic North Eastern Aegean through the emergence manufacture distribution and consumption of a regional pottery group known as G 2 3 Ware It offers the first comprehensive in depth study through combination of scientific fabric analysis and traditional morphological stylistic comparative and distribution analysis methods The large body of studied material allows for drawing conclusions on a broader geographical and historical scale in contrast to earlier studies focused on individual sites The manufacture distribution and consumption patterns are characterised by diversity which reflects a dynamic multiethnic communication network developed in the Northern Aegean basin in the late 8th and the 7th c BC The adoption of G 2 3 Ware by local Thracian coastal communities is discussed in the light of transfer of knowledge and social practices It is argued that the G 2 3 Ware potters were aware of earlier and contemporaneous ceramic developments in southern Greece and Anatolia and created a blend of pottery features specific for each one of these areas The study deconstructs the forged link between G 2 3 Ware and the Greek colonisation in the area by linking it to a local pre colonial development      Sally Rutherford Roberts: The attic pyxis Wolf Rudolph, 1980      **Lefkandi** Mervyn R. Popham, Petros G. Themelis, 1980      *The Protogeometric Aegean* Irene S. Lemos, 2002 This is the first full and up to date survey of Aegean archaeology at the beginning of the Iron Age late eleventh and tenth centuries BC since Snodgrass's classic *The Dark Age of Greece* 1971 These crucial 150 years in the development of ancient Greek society are known as the Protogeometric period after the characteristic pottery which was commonly in use in the Aegean The book offers a detailed account of old and new discoveries with chapters on pottery metal finds burial customs and architectural remains and how to use them to understand the social and political structure of the society This analysis of the material culture of the period covers not only well known sites such as Athens and Lefkandi but also other less familiar regions many of which are discussed in English for the first time In addition Dr Lemos examines a number of specific issues such as relative and absolute chronology the introduction of iron technology in the Aegean and the use of handmade pottery and jewellery The archaeological record is also used to suggest interpretations of the social and political structure of the society cult practices and the use of Homer in understanding the period The book challenges the description of the period from the collapse of the Mycenaean palace system to the formation of early Greek city states as the Dark Age of Greece Dr Lemos argues that some of the advances on socio economic structures towards the formation of states which were thought to belong to the eighth century BC might have started to develop much earlier in the course of the tenth century      **Corpus Vasorum**

Houby-Nielsen, 2020-07-24 Homeric Chalkis is situated on the coast of Aetolia at the very gateway of the Gulf of Patras The foundation occurred during an important period in early Greek history when trade and movement of peoples along the Gulf intensified with a resulting strong pull to the coast Well preserved stratigraphies date the foundation to the early seventh century BC and testify to a flourishing settlement in the sixth century lasting till the early fifth century BC when the site was temporarily given up Walls and roads follow a rectilinear layout A broad spectre of pottery shapes and wares attest to innovative local and regional workshops already from the onset of the settlement Alongside the pottery tools for complex textile manufacture were found in all houses among which were many small pyramidal loom weights and spools These findings indicated a high degree of experimental weaving techniques and demonstrated how the courtyard house as a new house model was particularly well suited to accommodate this manufacture probably mantels The results therefore offer important new evidence on relations between gender behaviour and Greek houses The catalogue is richly illustrated with profile drawings plans black and white and colour photos and accompanied by discussions of the material **Opuscula**
