The Baltic Revolution:

The Baltic Revolution Anatol Lieven, 1999 *The Singing Revolution* Clare Thomson, 1992 **The West's East** Lukas Milevski, 2018 Defense of the Baltic gained unprecedented prominence in the West after 2014 The West's East presents a historical strategic perspective on the region's 800 year geopolitical significance and applies strategic theory to analyze the contemporary strategic balance and potential dynamics of armed conflict between the West and Russia over the Baltic

Ethnopolitics in the New Europe John T. Ishiyama, Marijke Breuning, 1998 Applying a framework derived from comparative politics and IR theory the authors of this text explore two sets of empirical cases the emergence of new nationalisms in old European democracies and the re emergence of old nationalisms in several new democracies **Eastern Europe** Richard Frucht, 2004-12-22 A contemporary analysis of the people cultures and society within the regions that make up Eastern Europe Eastern Europe An Introduction to the People Lands and Culture sheds light on modern day life in the 16 nations comprising Eastern Europe Going beyond the history and politics already well documented in other works this unique three volume series explores the social and cultural aspects of a region often ignored in books and curricula on Western civilization The volumes are organized by geographic proximity and commonality in historical development allowing the countries to be both studied individually and juxtaposed against others in the region The first volume covers the northern tier of states the second looks at lands that were once part of the Hapsburg empire and the third examines the Balkan states Each chapter profiles a single country its geography history political development economy and culture and gives readers a glimpse of the challenges that lie ahead Vignettes on various topics of interest illuminate the unique character of each country Identity and Continuity of States in Public International Law Krystyna Marek, 1968 **Russian Minority**

Politics in Post-Soviet Latvia and Kyrgyzstan Michele E. Commercio, 2011-06-06 The collapse of the Soviet Union suddenly rendered ethnic Russians living in non Russian successor states like Latvia and Kyrgyzstan new minorities subject to dramatic political economic and social upheaval As elites in these new states implemented formal policies and condoned informal practices that privileged non Russians ethnic Russians had to react In Russian Minority Politics in Post Soviet Latvia and Kyrgyzstan Michele E Commercio draws on extensive field research including hundreds of personal interviews to analyze the responses of minority Russians to such policies and practices In particular she focuses on the role played by formal and informal institutions in the crystallization of Russian attitudes preferences and behaviors in these states Commercio asks why there is more out migration and less political mobilization among Russians in Kyrgyzstan a state that adopts policies that placate both Kyrgyz and Russians and less out migration and more political mobilization among Russians in Latvia a state that adopts policies that favor Latvians at the expense of Russians Challenging current thinking she suggests that the answer to this question lies in the power of informal networks After the fall of the Soviet Union the Communist party Komsomol youth organization and KGB networks were transformed into informal networks Russians in Kyrgyzstan were for various

reasons isolated from such networks and this isolation restricted their access to the country's private sector making it difficult for them to create effective associations capable of representing their interests. This resulted in a high level of Russian exit and the silencing of Russian voices. In contrast, Russians in Latvia were well connected to such networks which provided them with access to the country's private sector and facilitated the establishment of political parties and nongovernmental organizations that represented their interests. This led to a low level of Russian exit and high level of Russian voice. Commercio concludes that informal networks have a stronger influence on minority politics than formal institutions.
