Labyrinths Of Power Political Recruitment In Twentieth Century Mexico:

Labyrinths of Power Peter H. Smith, 2015-03-08 Peter Smith has written a comprehensive and in depth study of the structure and more important of the transformation of the national political elite in twentieth century Mexico. In doing so he analyzes the long run impact of the Mexican Revolution of 1910 on the composition of the country's ruling elite. Included in his focus are such issues as the social basis of politics the recruitments process political career patterns the amount of periodic turnover and the relationships between the political and economic elites. The author explores these issues through an empirical computer assisted investigation of biographical information on more than 6 000 individuals who held national political office in Mexico at any time between 1900 and 1976. He then employs various comparative and statistical techniques along with a use of archival data questionnaires and interviews to determine precisely how Mexico's political system actually works. Professor Smith finds that the Revolution of 1910 did not fundamentally alter the class composition of the national elite although it did redistribute power within it. He further observes that the Mexican Revolution did bring about a separation of political and economic elites and that the route to political success is much more varied and less predictable now than before the revolutionary period. Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Political Recruitment across Two Centuries Roderic Ai Camp, 2013-12-06 During more than twenty years of field research Roderic Ai Camp built a monumental database of biographical information on more than 3 000 leading national figures in Mexico. In this major contribution to Mexican political history he draws on that database to present a definitive account of the paths to power Mexican political leaders pursued during the period 1884 to 1992. Camp's research clarifies the patterns of political recruitment in Mexico showing the consequences of choosing one group over another. It calls into question numerous traditional assumptions including that upward political mobility was a cause of the Mexican Revolution of 1910. Comparing Mexican practices with those in several East Asian countries also allows Camp to question many of the tenets of political recruitment theory. His book will be of interest to students not only of Mexican politics but also of history comparative politics political leadership and Third World development.

Pesos and Politics Mark Wasserman,2015-04-15 The relationship between business and politics is crucial to understanding Mexican history and Pesos and Politics explores this relationship from the mid nineteenth century dictatorship of Porfirio Diaz through the Mexican Revolution 1876 1940 Historian Mark Wasserman argues that throughout this era over the course of successive regimes there was an evolving enterprise system that had to balance the interests of the Mexican national elite state and local governments large foreign corporations and individual foreign entrepreneurs During and after the Revolution these groups were joined by organized labor and organized peasants Contrary to past assessments Wasserman argues that no one of these groups was ever powerful enough to dominate another Because Mexican governments and elites committed themselves to economic models that relied on foreign investment and technology they had to reach a balance that simultaneously attracted foreign entrepreneurs but did not allow them to become too powerful or too privileged Concentrating on the three most important sectors of the Mexican economy mining agriculture and railroads and employing a series of case studies of the careers of prominent Mexican business people and the operations of large U S owned ranching and mining companies Wasserman effectively demonstrates that Mexicans in fact controlled their economy from the 1880s through 1940 foreigners did not exploit the country and Mexicans established sometimes shakily sometimes unplanned a system of relations between foreigners elite and government and later unions and peasant organizations that maintained checks and balances on all parties

Morales Gomez,Carlos Alberto Torres,1990-05-11 An important contribution to the growing body of work on Latin American policy making in education this volume presents a critical analysis of the conflicts and contradictions inherent in educational policy planning in Mexico since the early 1970s In an effort to forge a clearer and more comprehensive understanding of the processes involved the authors examine the complex relationships among the politics of a corporative State built on the remains of a revolutionary tradition the current model of associated dependent development and the process of policy formation in formal and nonformal education Analysis of specific cases enables the authors to present an overview of the factors involved in the designing planing and implementation of educational policies in Mexico as well as assessing the effects of educational change on the poorest sectors of its society Morales Gomez and Torres begin by analyzing some of the political economy factors that historically have determined the

current process of associate dependent development in Mexico and how they have evolved and shaped the role of education in the country They show how educational policies and practices are affected by the processes of sociopolitical change that underly the formation and evolution of the corporatist State A critical review of the structure and functioning of the educational system in Mexico precedes three case studies of formal and nonformal education that illustrate the relationships among the predominant ideas shaping current development in the country the process of policy formation in education and the actual practice of formal and nonformal education The first case study examines primary education as a manifestation of the contradictions in educational policy the second focuses on some of the nonformal initiatives carried out by the government over the last two decades and the third looks at adult workers education *Area Studies* ,1987 **Mexico's**

Hidden Revolution Peter L. Reich,1995 Mexico s Hidden Revolution is the first book to examine the relationship between the Catholic church and the government in Mexico from 1929 until the present Following the Mexican Revolution religion was constitutionally banned from the political sphere church property was seized and clerical attire was outlawed in public Yet as this fascinating study demonstrates behind the scenes the church and government had a tacit understanding that has led to cooperation rather than conflict Reich s empirical and theoretical analysis in Mexico s Hidden Revolution will interest scholars and students in the fields of Latin American history legal history political science and religious studies In addition all readers interested in the current constitutional debates in Mexico over the appropriate role for Catholicism in public life will find Mexico s Hidden Revolution an important and timely book *The Modern Mexican Military* David F. Ronfeldt,1985 This study considers the effect of the Mexican military on Mexico s domestic and foreign policies its ability to assure Mexico s stability and security and its likely behavior in a serious political or foreign policy crisis It reviews the Mexican military s modernization program and institutional transformations within the Mexican government as factors affecting Mexican national stability and security It argues that the military is becoming a more visible respected and modernized partner of Mexico s ruling institutions and that a close civil military partnership may result in which the military with civilian agreement plays expanded roles in determining how to resolve the new agenda of domestic and foreign security issues confronting Mexico
