Labyrinths Of Power Political Recruitment In Twentieth Century Mexico:

Labyrinths of Power Peter H. Smith, 2015-03-08 Peter Smith has written a comprehensive and in depth study of the structure and more important of the transformation of the national political elite in twentieth century Mexico. In doing so he analyzes the long run impact of the Mexican Revolution of 1910 on the composition of the country's ruling elite. Included in his focus are such issues as the social basis of politics the recruitments process political career patterns the amount of periodic turnover and the relationships between the political and economic elites. The author explores these issues through an empirical computer assisted investigation of biographical information on more than 6 000 individuals who held national political office in Mexico at any time between 1900 and 1976. He then employs various comparative and statistical techniques along with a use of archival data questionnaires and interviews to determine precisely how Mexico's political system actually works. Professor Smith finds that the Revolution of 1910 did not fundamentally alter the class composition of the national elite although it did redistribute power within it. He further observes that the Mexican Revolution did bring about a separation of political and economic elites and that the route to political success is much more varied and less predictable now than before the revolutionary period. Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Political

Recruitment across Two Centuries Roderic Ai Camp, 2013-12-06 During more than twenty years of field research Roderic Ai Camp built a monumental database of biographical information on more than 3 000 leading national figures in Mexico. In this major contribution to Mexican political history he draws on that database to present a definitive account of the paths to power Mexican political leaders pursued during the period 1884 to 1992. Camp's research clarifies the patterns of political recruitment in Mexico showing the consequences of choosing one group over another. It calls into question numerous traditional assumptions including that upward political mobility was a cause of the Mexican Revolution of 1910. Comparing Mexican practices with those in several East Asian countries also allows Camp to question many of the tenets of political recruitment theory. His book will be of interest to students not only of Mexican politics but also of history comparative politics political leadership and Third World development.

current process of associate dependent development in Mexico and how they have evolved and shaped the role of education in the country They show how educational policies and practices are affected by the processes of sociopolitical change that underly the formation and evolution of the corporatist State A critical review of the structure and functioning of the educational system in Mexico precedes three case studies of formal and nonformal education that illustrate the relationships among the predominant ideas shaping current development in the country the process of policy formation in education and the actual practice of formal and nonformal education The first case study examines primary education as a manifestation of the contradictions in educational policy the second focuses on some of the nonformal initiatives carried out by the government over the last two decades and the third looks at adult workers education

This study considers the effect of the Mexican military on Mexico s domestic and foreign policies its ability to assure Mexico s stability and security and its likely behavior in a serious political or foreign policy crisis It reviews the Mexican military s modernization program and institutional transformations within the Mexican government as factors affecting Mexican national stability and security It argues that the military is becoming a more visible respected and modernized partner of Mexico s ruling institutions and that a close civil military partnership may result in which the military with civilian agreement plays expanded roles in determining how to resolve the new agenda of domestic and foreign security issues confronting
