

(b) Direct costs are production costs.

Discussion: A, B, and C are production costs, whereas selling & administration costs are period costs.

(b) Last month 200,000 units of a product were manufactured, and the total cost per unit was \$200. This month 150,000 units of the same product were manufactured, and the total cost per unit was \$200. The total cost of production for the month was \$30,000 per unit and the total cost is \$30,000,000. Therefore, the cost per unit is \$200,000/150,000 units = \$200.00. Alternatively, when production costs increase, total cost of production increases (the same fixed costs is spread over more units, resulting cost per unit will increase).

(b) These costs do not reflect cost changes.

(b) These costs will increase in total.

(c) These costs per unit will increase.

**(d) These costs per unit will decrease.**

Discussion: Previously, the selling price was \$200/150,000 units = \$133.33. The cost per 150,000 units = \$200,000 units / 150,000 units = \$2000/150,000 = \$13.33. Therefore, the selling price per unit is \$200,000/150,000 units = \$200.00. Alternatively, when production costs increase, total cost of production increases (the same fixed costs is spread over more units, resulting cost per unit will increase).

(b) The following costs were incurred in the month:

Direct materials	\$100,000
Direct labor	\$15,000
Manufacturing overhead	\$17,000
Selling expenses	\$20,000
Administrative expenses	\$17,000

Discussion: Selling the remaining 100000 units.

(a) \$170,000

(b) \$180,000

**(c) \$190,000**

(d) \$200,000

Discussion: Selling costs are direct labor and direct manufacturing costs.

(b) 200000 Company costs will be equivalent for \$2000,000 per unit. In 200000 the corresponding fixed costs will be \$100000. Other costs will be as follows:

Manufacturing cost per unit	\$100,000
Fixed cost of sales	\$100,000
Manufacturing & administration costs	\$100,000
Fixed selling & administration costs	\$100,000

What is the total contribution of the sales contribution margin?

(a) \$100,000

(b) \$1000,000

**(c) \$1000,000**

(d) \$1000,000

Discussion: Total contribution margin = Total Sales - Total Variable Costs. Total Sales = \$200,000 \* 200000 = \$40,000,000. Total Variable Costs = \$100,000 \* 200000 = \$20,000,000. Contribution Margin = \$20,000,000 - \$100,000 \* 200000.
