Emotional Data Applications and Regulation of Artificial Intelligence in Society Rosa Ballardini, Rob van den Hoven van Genderen, Sari Järvinen, 2025-01-22 This revolutionary new book on using AI to process human emotion data seeks to raise awareness for the topic thoroughly discuss it from a multidisciplinary perspective and by doing so disseminate research findings that elaborate on the current and future regulatory needs for the responsible and ethical development and application of emotional AI Biometric and psychological data of humans are the most sensitive data on human behavior The book s objective is to provide a holistic understanding of key challenges and propose novel workable substantive and methodological solutions for navigating current and future legal and ethical needs and dilemmas regarding the processes of developing and using emotional AI Although both the academic community and political decision makers continue to intensively discuss issues in the ethical regulation of AI there is still a very limited understanding of both the opportunities and the risks in connection with emotional AI specifically Yet emotional AI is one of the most promising areas of AI developments and applications Several of these innovations could be a welcome change in our society as they could improve our well being in various ways That being said these inventions require considerable investments Thus legal incentives such as IPRs are crucial to supporting investment in these fields Further these innovations might have negative effects on the privacy and autonomy of natural persons raising both legal and ethical concerns Thus their legal and ethical acceptability as well as their societal acceptance might be challenged by several legal provisions in the EU such as the GDPR regulations on communications social platforms and marketing and the draft AI Act Yet the current legal landscape for emotional AI in Europe is anything but clear an aspect that becomes even more apparent when we consider the global picture of the regulatory framework for emotional AI In this book a diverse team of internationally respected experts addresses these issues engaging in a multidisciplinary study into techno economic legal developments concerning emotional AI its impacts and the need for action The book offers in depth scientific and societally relevant insights on the past present and future of AI in general especially its many implications for law and policy Although the primary target audience for the book are academics from the field of law the book also offers sound guidance for legislators and general policymakers as well as companies and organizations

Requirements Engineering for Software and Systems Phillip A. Laplante, 2017-10-24 Solid requirements engineering has increasingly been recognized as the key to improved on time and on budget delivery of software and systems projects This textbook provides a comprehensive treatment of the theoretical and practical aspects of discovering analyzing modeling validating testing and writing requirements for systems of all kinds with an intentional focus on software intensive systems It brings into play a variety of formal methods

social models and modern requirements for writing techniques to be useful to the practicing engineer This book was written to support both undergraduate and graduate requirements engineering courses Each chapter includes simple intermediate and advanced exercises Advanced exercises are suitable as a research assignment or independent study and are denoted by an asterisk Various exemplar systems illustrate points throughout the book and four systems in particular a baggage handling system a point of sale system a smart home system and a wet well pumping system are used repeatedly These systems involve application domains with which most readers are likely to be familiar and they cover a wide range of applications from embedded to organic in both industrial and consumer implementations Vignettes at the end of each chapter provide mini case studies showing how the learning in the chapter can be employed in real systems Requirements engineering is a dynamic field and this text keeps pace with these changes Since the first edition of this text there have been many changes and improvements Feedback from instructors students and corporate users of the text was used to correct expand and improve the material This third edition includes many new topics expanded discussions additional exercises and more examples A focus on safety critical systems where appropriate in examples and exercises has also been introduced Discussions have also been added to address the important domain of the Internet of Things Another significant change involved the transition from the retired IEEE Standard 830 which was referenced throughout previous editions of the text to its successor the ISO IEC IEEE 29148 standard
