## **The Medieval Machine:**

The Medieval Machine Jean Gimpel, 1977 The Middle Ages saw the first the true Industrial Revolution a change much more far reaching than the popularly accepted turning point of the 19th century Surveying technology and invention medieval scholar and social historian Jean Gimpel shows how energy resources manpower and sheer ingenuity revolutionized medieval agriculture industry construction and mining and he argues that the eventual economic and social decline that began in 14th century Europe parallels the feelings of modern industrial society especially as seen in the United States today

**The medieval machine** Jean Gimpel, 1965 *The medieval machine (La révolution industrielle du Moyen Age, engl.)*  
*The industrial revolution of the Middle Ages* Jean Gimpel, 1976 *Machines as the Measure of Men* Michael Adas, 1989 This new edition of what has become a standard account of Western expansion and technological dominance includes a new preface by the author that discusses how subsequent developments in gender and race studies as well as global technology and politics enter into conversation with his original arguments *The Machine in the University* Terry S. Reynolds, 1987

*Sublime Dreams of Living Machines* Minsoo Kang, 2011-02-28 Historian Minsoo Kang argues that to properly understand the human as machine and the human as fundamentally different from machine we must trace the origins of these ideas and examine how they were transformed by intellectual cultural and artistic appearances of the automaton throughout the history of the West Kang tracks the first appearance of the automaton in ancient myths through the medieval and Renaissance periods marks the proliferation of the automaton as a central intellectual concept in the Scientific Revolution and the subsequent backlash during the Enlightenment and details appearances in Romantic literature and the introduction of the living machine in the Industrial Age He concludes with a reflection on the destructive confrontation between humanity and machinery in the modern era and the reverberations of the humanity machinery theme today **Christianity On Trial**

Vincent Carroll, David Shiflett, 2001-12-01 In *Christianity on Trial* Vincent Carroll and David Shiflett do not shrink from confronting the tragedies that have been perpetrated throughout the ages in the name of Christianity But they argue that the current indulgence of anti Christian rhetoric in our culture not only involves bad taste but tunnel vision and willful historical illiteracy as well Carroll and Shiflett dispassionately consider the indictment of Christianity specifically that it has justified racism and misogyny encouraged ignorance and promoted the despoliation of the environment and even justified genocide Then in a narrative whose intellectual elegance and verve calls up comparisons to *How the Irish Saved Civilization* they answer these charges showing how in fact the Christian tradition has not only injected morality into our political order but softened brutal practices and confining superstitions created the foundation for intellectual inquiry and created the compassionate impulse *Christianity on Trial* challenges readers of all beliefs even those with a belief in disbelief itself to question the anti religious bigotry that thrives in our intellectual world and to reevaluate the role of Christianity not only as a source of consolation but of enlightenment and human liberation as well *Science and Technology in World History*,

*Volume 2* David Deming, 2014-01-10 Science is a living organic activity the meaning and understanding of which have evolved incrementally over human history This book the second in a roughly chronological series explores the evolution of science from the advents of Christianity and Islam through the Middle Ages focusing especially on the historical relationship between science and religion Specific topics include technological innovations during the Middle Ages Islamic science the Crusades Gothic cathedrals and the founding of Western universities Close attention is given to such figures as Paul the Apostle Hippolytus Lactantius Cyril of Alexandria Hypatia Cosmas Indicopleustes and the Prophet Mohammed     **Species and Machines** Martyn Hudson, 2017-09-18 This book offers a re examination of the relationship between humans and nature with a new methodology by examining our entanglement with machines Using central ideas of critical theory it uncovers the suppression of nature through technology tools and engines It focuses on the ways in which human social forms have actively subjugated and destroyed other species in order to enhance their own social power and accumulation leading to a new Anthropocene epoch in which human intervention is signalled in the geological record Beginning with an account of the interactions between humans and other species the book moves on to explore the hidden history of Marx and his obsession with machines as well as new attempts to rethink a Marxist ecology before proceeding to examine the manner in which technologies were used to suppress and destroy one particular species the Whale of what we call the Cetacean Holocaust Following this there are analyses of the emergence of the human encampments of the cities and the rise of mobile locomotive cultures and consideration of the relationship between machines of memory and the capturing of nature A radical rethinking of classical social theory that develops new ways of thinking about ecological catastrophe and nature this book will appeal to scholars of social theory and environmental sociology     **The Book of Ser Marco Polo, the Venetian** Marco Polo, 1875 *Annual Report* Ontario.
