## **The Coffee:**

*THE COFFEE WORLD* Prof. Mustafa Y.G. Younis, 2024-09-03 Coffee is a dark drink ranging from brown to black with a bitter taste. Coffee is prepared from boiling ground coffee. Coffee beans are collected from the all year greenery coffee tree. The beans are roasted and grinded then prepared. Many people in the Middle East add cardamom and coriander to their coffee which gives it pleasant smells that ecstasy the soul so that it cannot resist its temptation when we drink it our souls are refreshed and it provides us with a good mood and makes us feel peaceful and comfortable. The word coffee was derived from the name of the town of Caffa in Abyssinia Ethiopia. Other evidence reported that the coffee tree originated from Yemen where it was exported from the city of Mocha thus coffee called Mocha Caffe. If I ask you about your favorite drink and your answer is coffee don't be surprised you are among the millions of people who consider coffee their only choice. According to Insider Monkey People consume more than 500 billion coffee cups year around the globe. Drinking coffee every morning gives a person a wonderful mood mental clarity and a sense of happiness and brilliance. Coffee also has a role in the permanence of intimacy between people whether they are friends or loved ones relatives or strangers. Coffee in cold weather gives us warmth and tranquility and many people love it every sunrise before going to work to clear their minds and arrange their thoughts. The book devoted an extensive section to clarifying the positive role of coffee on human health and its beneficial effects on all organs and systems of the human body were explained. Through listing the results of medical research it became clear to us that coffee has a clear positive effect on human health in general if it is consumed in moderate quantities and without excess.

*The Coffee Paradox* Benoit Daviron,Stefano Ponte,2013-07-18 Can developing countries trade their way out of poverty International trade has grown dramatically in the last two decades in the global economy and trade is an important source of revenue in developing countries Yet many low income countries have been producing and exporting tropical commodities for a long time They are still poor This book is a major analytical contribution to understanding commodity production and trade as well as putting forward policy relevant suggestions for solving the commodity problem Through the study of the global value chain for coffee the authors recast the development problem for countries relying on commodity exports in entirely new ways They do so by analysing the so called coffee paradox the coexistence of a coffee boom in consuming countries and of a coffee crisis in producing countries New consumption patterns have emerged with the growing importance of specialty fair trade and other sustainable coffees In consuming countries coffee has become a fashionable drink and coffee bar chains have expanded rapidly At the same time international coffee prices have fallen dramatically and producers receive the lowest prices in decades This book shows that the coffee paradox exists because what farmers sell and what consumers buy are becoming increasingly different coffees It is not material quality that contemporary coffee consumers pay for but mostly symbolic quality and in person services As long as coffee farmers and their organizations do not control at least parts of this immaterial production they will keep receiving low prices The Coffee Paradox seeks ways out from this situation by addressing some key questions What kinds of quality attributes are combined in a coffee cup or coffee package Who is producing these attributes How can part of these attributes be produced by developing country farmers To what extent are specialty and sustainable coffees achieving these objectives
