### **Your Child Doesn't Listen to You: You Live in Dependency and Symbiosis**

Edenilson Brandl, In a world where parental involvement is often seen as a reflection of love and care we seldom pause to question the consequences of over involvement or what we commonly term dependency within parent child relationships While it is natural for parents to protect guide and nurture their children an excessive need for control can hinder a child's emotional growth autonomy and ability to navigate the complexities of life independently This book delves into the psychological and emotional impact of overprotection examining how the dynamic between dependency and independence shapes a child's development The aim of this work is not to vilify parental care but to bring awareness to the delicate balance necessary for fostering a healthy relationship one that allows children to grow into emotionally resilient and self-sufficient individuals Through a deep exploration of family dynamics symbiosis and the natural process of emotional development this book seeks to highlight the hidden consequences of well-meaning actions that may inadvertently impede a child's ability to achieve true autonomy Drawing on research in psychology case studies and real-life examples this book is designed for parents caregivers educators and anyone interested in understanding the intricate ways parental control influences personal growth It encourages a shift in perspective seeing love not as control but as the ability to step back and allow children to experience life on their own terms May this book inspire thoughtful reflection on how we as a society can foster healthier more independent futures for our children by rethinking our notions of protection care and the path to emotional freedom
