*Programming: Creative Techniques for Design Professionals* Robert R. Kumlin, 1995-05-22 Architectural programming is the key to successful design. It is the crucial process of gathering, organizing, and assessing a client's building use information. This process includes design concepts and program objectives, staff and employee projections, current and future space requirements, adjacencies and relationships, equipment and utility requirements, project cost, and more. This unique book and diskette provide architects, engineers, facilities managers, corporate and institutional administrators, and others with an effective method for gathering and assessing data needed to successfully design virtually any type of building, from office towers and educational facilities to laboratories and medical facilities.
