## **Teaching And Learning At A Distance:**

**Teaching and Learning at a Distance** Michael Simonson,Susan Zvacek,2024-01-03 Teaching and Learning at a Distance is for introductory distance education courses and training programs It covers themes like defining distance education the importance of research media s role equivalency theory and comprehensive coverage of distance learning methods *Teaching and Learning at a Distance* Michael Simonson,Sharon Smaldino,Susan M. Zvacek,2014-10-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a distance is derived from Richard Clark s famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field **Learning and Teaching in Distance Education** Otto Peters,2013-04-03 This unique and comprehensive overview of open and distance education is written by one of the best known names in the field It integrates historical contemporary and future aspects of distance education Packed with international case studies it goes beyond looking at the methods and technology of distance education giving Otto Peters renowned visions on the

expanding discipline *Distance and E-learning in Transition* András Szűcs, Alan Tait, Martine Vidal, Ulrich Bernath, 2013-03-01 The rushed development of information and communication technologies and their impact on the world of learning in the last decade have profoundly changed the paradigms scenarios and values at all levels of education. The professionalization of tools and practices in addition to the consolidation of academic and practical knowledge has been a major continuing issue throughout these years. The annual conferences of the largest European professional community in distance and e learning have been setting the landmarks in this process. The selection from this unique knowledge pool demonstrates the deepening and consolidation of knowledge and experience. This book presents the developments in the field of open distance and e learning through new technologies methodologies and tools which have profoundly changed the paradigms scenarios and values at all levels of education over the last decade Rethinking Learner Support in Distance Education Roger Mills, Alan Tait, 2004-08-02 Distance learning is becoming an increasingly popular way of studying and most universities now provide courses using these methods. Today's students though are demanding high quality consumer focused and flexible courses as well as learning resources and active learner support. This means that providers of distance education need to reconsider key issues about their learner support systems ensuring that this is delivered appropriately and effectively. Considering the changing needs and demands of distance education students this book draws together contributions from the UK USA Hong Kong Australia Japan South Africa and Botswana to offer an international perspective on the challenges and opportunities of Information and Communication Technologies ICT quality assurance commercialisation and the learner as consumer. The impact on learners of cultural differences on internationalised curricula the implications for learner support of a wider range of learners.
