

Teaching Children To Learn

Sean MacBlain, Author

Teaching Children To Learn:

Children Teach Children Alan Gartner, Mary Conway Kohler, Frank Riessman, 1971 *Teaching Children to Learn* Robert Fisher, 2005 This exciting book fosters the skills involved in learning providing a framework for developing active learning in every community classroom and school This new edition suggests more ways to create powerful learning environments Teaching Children to Learn has been revised and enlarged giving more practical ideas to develop creative learning skills It includes new sections on learning styles accelerated learning and ways to motivate learning *The Learning Child* Dorothy Cohen, 1988-04-12 Hailed as a classic in developmental psychology The Learning Child is as relevant today as when it was first published in 1972 if not more so Drawing on the findings of psychologists like Piaget and on the author's own experiences teaching child development at New York's Bank Street College Cohen explores the crucial links between learning and the successive stages of childhood and shows parents and teachers how to turn a child's natural instinct for inquiry into a talent for learning that will last a lifetime If American parents will read and listen to Dr Cohen's sensible wise analysis of the way young children learn my faith in human beings will be restored It was refreshing and reassuring to read a book by someone who approaches childhood with love and profound wisdom Eda LeShan author of *When Your Child Drives You Crazy* Children Teach Children , 1996 *Young Children Learning* Barbara Tizard, Martin Hughes, 1984 his fascinating account of an unusual research project challenges many assumptions about how young children learn and how best to teach them In particular it turns upside down the commonly held belief that professionals know better than parents how to educate and bring up children and it throws doubt on the theory that working class children underachieve at school because of a language deficit at home *Teaching Children Dance* Susan M. Flynn, Emily Enloe, Theresa Purcell Cone, Stephen L. Cone, 2023-11-16 Teaching Children Dance is back and better than ever The fourth edition of this text retains everything dance educators have loved in previous editions while providing significant updates and new material What's New in This Edition New material in the text which contains learning experiences for physical education dance and classroom settings and is geared toward K-12 students of all ability levels includes the following Two new chapters that feature 32 new learning experiences for popular fitness and social dances as well as for folk and cultural dances based on traditional movements and songs from around the globe Instructional videos of teaching techniques movements and dances from the two new chapters Online resources accessed through HKPropel that include PowerPoint presentations gradable assessments and forms that can be used as is or adapted Other new material includes suggested answers to chapter ending reflection questions updates to discussions on dance and the whole child education initiative new material on how 21st century skills promote creative thinking collaboration communication global awareness and self-direction and a description of the link between dance and the 2018 Physical Activity Guidelines for Americans Dance an Inherent Component of Education This latest edition of Teaching Children Dance brings a new perspective focused on dance as an inherent

component of a child's education says coauthor Susan Flynn. Since our last edition educational issues have refocused on students gaining knowledge and skills that can be applied to all aspects of their lives. Dance is one mode for learning that involves using the body and the senses to gather information, communicate and demonstrate conceptual understandings. Book Organization: The text is organized into two parts with part I's seven chapters providing the foundation for developing dance learning experiences and offering ideas for planning a yearlong program, a unit or a single lesson. Part II contains two chapters of creative dance learning experiences and two chapters on choreographed learning experiences. Each learning experience includes learning outcomes, ideas for the introduction and warm up, development and culminating dance variations and adaptations, and assessment suggestions that are directly linked to each outcome. Fun Learning for All Ability Levels: Teaching Children Dance offers dance instructors insight into designing lessons for students of all skill levels, including those with disabilities, and provides a variety of teaching strategies, assessment tools, and instruction on effective demonstrations all to make the learning experience fun and motivating for the dancers. We've developed learning experiences that encourage creativity, positive social interaction, and motor skill development, says Flynn. Students view dance as a way to have fun. This opens the door for dance to be a welcomed activity in the school curriculum. Note: A code for accessing HKPropel is not included with this ebook but may be purchased separately.

How Children Learn (New Edition) Linda Pound, 2019-10-08. An ideal introduction to the pioneers of educational theory for anyone studying childcare, child development, or education, whether at further or higher education level. The first edition of this book has been a best seller for almost a decade, identified as one of the top ten books for students of child development or early childhood care and education. In this new edition, there is an increased emphasis on both what practice based on particular theories of learning looks like and on criticisms of each theory. A glossary is included in sections highlighting words and concepts particular to the theorist in question. Full colour photographs are used to illustrate some aspects of each theory or approach. How Children Learn looks at a wide range of theorists and practitioners who have influenced current understandings of how children learn and what this means for work with young children. The book summarises the findings and ideas of famous giants such as Montessori and Piaget, as well as the more recent ideas of writers and thinkers such as Howard Gardner and Margaret Donaldson. It begins by looking at the work and life of Comenius, who is widely described as the father of modern education, and looks at the theory behind different approaches to early childhood care and education such as Steiner-Waldorf education, HighScope, and Te Whāriki. You will find this book invaluable in giving you a clearer picture of how ideas about children's learning have developed over the past four centuries.

Children's Learning in Early Childhood Sean MacBlain, Author, 2021-03-03. Everything you need to know about Learning Theories in Early Childhood practice. This book explores the key theorists and theories that form the foundation of learning and development in early childhood. Building your own understanding and knowledge of children's learning, it then helps you develop the skills of translating theory into

practice How does this book support you The structure of the book mirrors your student learning journey to compliment your course and seminar reading Parts 1 and 2 help you develop your reflective and analytical skills through critical questions photographs and discussion points Part 3 gives real life case studies to help you understand how the theories can be practically applied in settings to improve your own practice **Teaching Your Child to Love Learning** Judy Harris Helm,2004

How Children Learn John Holt,2009-04-20 From the preface by Deborah Meier We have a long way to go to make John Holt s dream available to all children But his books make it possible and easier for many of us to join him in the journey In this enduring classic rich with deep original insight into the nature of early learning John Holt was the first to make clear that for small children learning is as natural as breathing In his delightful book he observes how children actually learn to talk to read to count and to reason and how as adults we can best encourage these natural abilities in our children

What If We Taught the Way Children Learn? Rae Pica,2020 Strengthen the connection between child development and learning We often teach our children in ways contrary to what we know about their development What if our learning environments honored children s natural inclinations and used them to enrich their lives To help students experience joy and discovery while also preparing them for future schooling we need to understand the connection between how they develop and how they learn Pica brings decades of experience in education to advocate for this change Written as a follow up to the bestselling What If Everybody Understood Child Development this book includes 31 easy to read chapters on topics including disruptive behavior creativity self regulation screen time and mental health Suggested next steps and resources in every chapter Real life examples from the author s and others experiences Evidence from brain science research Easy to read format perfect for PLCs book studies and parents The straight talk in this book inspires readers to generate change so that children can have the lives and education they deserve **Children Learning Outside the Classroom** Sue

Waite,2017-02-13 The new edition of this bestselling textbook continues to help students and professionals understand the importance of getting children learning outside the traditional classroom and is packed full of creative information and ideas for teachers and practitioners to incorporate outdoor activities throughout the school curriculum Significantly revised and updated the second edition now includes 7 brand new chapters on Methods of assessment and evaluation Global perspectives on outdoor learning Developing whole school approaches to indoor and outdoor teaching Technology and its role outside the classroom Special Education Needs and Disabilities SEND and learning outdoors Forest School The environmental sector and outdoor learning Whether you re training to become a teacher or already working in the classroom this book demonstrates how the outdoor environment is enriching learning opportunities for children and deepening their connections with the natural world NOW FEATURING Online resources that include free SAGE journal articles weblinks annotated further readings and video to help translate theory into real life practice Sue Waite will be discussing key ideas from Children Learning Outside the Classroom From Birth to Eleven in the SAGE Early Years Masterclass a free professional development
