Teaching In Japan A Cultural Perspective:

Teaching in Japan Nobuo Shimahara,2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company **Socio-Cultural Perspectives on Science Education** W.W. Cobern,2012-12-06 Global science education is a reality at the end of the 20th century albeit an uneven reality because of tremendous technological and economic pressures Unfortunately this reality is rarely examined in the light of what interests the everyday lives of ordinary people rather than the lives of political and economic elites The purpose of this book is to offer insightful and thought provoking commentary on both realities The tacit question throughout the book is Whose interests are being served by current science education practices and policies The various chapters offer critical analysis from the perspectives of culture economics epistemology equity gender language and religion in an effort to promote a reflective science education that takes place within rather than taking over the important cultural lives of people The target audience for the book includes graduate students in education science education and education policy professors policy and government officials involved with education **Teaching**

Japan: A Handbook Ioannis Gaitanidis,Gregory Poole,2025-10-01 This book aims to offer ideas and examples of pedagogy in the undergraduate classroom The basic premise taken by the authors begins with a question What if stereotypes surrounding Japan were not pushed to the margins in teaching but took center stage and were exposed for the multiple ways that they can be used to learn not only about Japan but of various scholarly disciplines The task then becomes constructing ways to challenge essentialist notions that do not seek merely to deny but to shift the conversation constructively by encouraging engagement with a theoretical field from which to acquire tools to critically and effectively evaluate stereotypes of Japan or other societies The result is a collection of carefully crafted case studies of syllabi that showcase pedagogies aimed at the deconstruction of concepts such as Japan Japanese or Japanese society while at the same time offering skills of inquiry that transcend the topics being deconstructed This handbook is a source of ideas from colleagues in a variety of disciplinary and institutional settings who are tackling the same issues current or future teachers who plan to use case studies from Japan in their lectures **The Changing Role of Schools in Asian Societies** John Chi-Kin Lee,2007-12-05 As Asia faces the challenges posed by the knowledge economy its schools take on a new and different importance This book outlines the policy contexts in which these transformations are taking place and the practical strategies that are needed **Perspectives of**

Music Education in Japan and ASEAN Countries Tatsuko Takizawa,1992 SUMMARY This book contains the reports of the seminar of ASEAN and Japan music educators held in Japan from 23rd August to 6th September 1991 **Learning to Teach in Two Cultures** Nobuo K. Shimahara,Akira Sakai,2018-10-09 Originally published in 1995 This ethnographic account of teaching practise in both Japan and the USA offers an excellent cross cultural perspective of education It focuses on beginning teachers and particularly highlights both the similarities and the contrasting elements between the two countries

In part the authors inquire into the socialisation of new teachers in their particular culture Chapters provide detailed

accounts of how teachers in the study in both countries learned to teach and the strategies they used when facing problems and key issues such as child motivation Both countries have sought to learn from each other s practices but this fascinating study will be of interest to anyone in the teaching world **Resources in Education** ,1987-10

Applying Theory and Research to Learning

Japanese as a Foreign Language Masahiko Minami,2007 Complex issues surround second language acquisition and foreign language learning in any language There is no doubt that individuals are capable of acquiring two or more languages at different stages of human development particularly in childhood Research investigating how adults acquire two languages also carries important insights into what takes place during later stages of human development From the fact that early and late bilinguals are faced with two languages in diverse stages of cognitive development we can predict differences in language processing between these two groups In the case of the Japanese language unfortunately far fewer studies particularly those written in English have been presented on foreign language learners and bilingual children Designed to address some of these gaps in the literature the chapters included in this book discuss various issues with regard to adult learners of Japanese as an L2 and English Japanese bilingual children This book provides the reader with an overview of the field of Japanese linguistics and its current concerns One of the main purposes of the book is to provide a forum in which to examine contributions in a variety of areas of Japanese linguistics to the teaching and learning of Japanese in the L2 classroom This book has at least two interrelated areas of benefit First both researchers and teachers benefit from each other TM s expertise and receive new insights that apply to their respective fields Second and more important the book serves as a forum to promote ways in which we can apply linguistic theory to the learning of Japanese as an L2 That is what researchers have learned from both theory and practice can suggest what is important for the teaching of language conversely language educators have a great deal to offer linguists regarding the phenomenon of language Thus the goal of this book is to integrate theoretical concepts and empirical research findings in L2 development in order to apply them to educational practice

Teaching Embodied Akiko Hayashi,Joseph Tobin,2015-07-23 When we look beyond lesson planning and

curricula those explicit facets that comprise so much of our discussion about education we remember that teaching is an inherently social activity shaped by a rich array of implicit habits comportments and ways of communicating This is as true in the United States as it is in Japan where Akiko Hayashi and Joseph Tobin have long studied early education from a cross cultural perspective Taking readers inside the classrooms of Japanese preschools Teaching Embodied explores the everyday implicit behaviors that form a crucially important but grossly understudied aspect of educational practice Akiko Hayashi and Joseph Tobin embed themselves in the classrooms of three different teachers at three different schools to examine how teachers act think and talk Drawing on extended interviews their own real time observations and hours of video footage they focus on how teachers embody their lessons how they use their hands to gesture comfort or discipline how they direct their posture gaze or physical location to indicate degrees of attention and how they use the tone of their voice to communicate empathy frustration disapproval or enthusiasm Comparing teachers across schools and over time they offer an illuminating analysis of the gestures that comprise a total body language something that while hardly ever explicitly discussed the teachers all share to a remarkable degree Showcasing the tremendous importance of and dearth of attention to this body language they offer a powerful new inroad into educational study and practice a deeper understanding of how teaching actually works no matter what culture or country it is being practiced in

Education about Asia ,2008 Symposium on Adult Education Policy Performance and International Perspective ,1994 Handbook of Asian Education Yong

Zhao,Jing Lei,Guofang Li,Ming Fang He,Kaori Okano,Nagwa Megahed,David Gamage,Hema Ramanathan,2010-11-30

Comprehensive and authoritative this Handbook provides a nuanced description and analysis of educational systems practices and policies in Asian countries and explains and interprets these practices from cultural social historical and economic perspectives Using a culture based framework the volume is organized in five sections each devoted to educational practices in one civilization in Asia Sinic Japanese Islamic Buddhist and Hindu Culture and culture identities essentially are civilization identities the major differences among civilizations are rooted in their different cultures This framework offers a novel approach to capturing the essence of the diverse educational systems and practices in Asia Uniquely combining description and interpretation of educational practices in Asia this Handbook is a must have resource for education researchers and graduate students in international and comparative education globalization and education multicultural education sociocultural foundations of education and Asian studies and for educational administrators and education policy makers
