Investigating the Teacher's Life and Work Ivor F. Goodson, 2008-01-01 Investigating the Teacher's Life and Work attempts to bring together the methodological and substantive aspects of studying the teacher's life and work Some of the chapters in the book provide a how to do approach for those wishing to study the teacher's life and work employing a life history method whilst other chapters provide the kind of substantive and generic findings which might be anticipated when conducting life history work The focus on professional life and work has been growing rapidly in the last two or three decades There are a number of reasons for this Firstly there is a methodological impulse many new studies are adopting a life history approach The life history tradition aims to understand the interface between people's life and their work It also seeks to explore the historical context and the socio political circumstances in which people's life and work is located A further major reason for

investigating the teacher's life and work at the moment is the huge range of restructuring initiatives taking place throughout the educational world. There is a kind of world movement to restructure education and health certainly in most Western countries. Generally this takes the form of the introduction of the three T's: targets, tests, and tables, and the increasing accountability and performativity regimes associated with these new forms of evaluation. Significantly these initiatives have been introduced at governmental level in most countries with the minimum of consultation with teacher workforces. As a result there is growing evidence of a clash between professional life and work missions and the restructuring initiatives which aim to transform these missions. Perhaps the best way to explore this increasingly acute clash of values is through the investigation of professional life and work. *Investigating the Teacher's Life and Work* aims to bring together the methodological and substantive approaches and to show how this kind of study can increase our understanding of the interface between government intentions and teacher's beliefs and motives. Catalogue of the Oakland Free Library Oakland Free Library, 1879 **Teaching Writing Creatively** David Starkey, 1998 *Teaching Writing Creatively* represents a challenge to conventional notions of genre. It seeks to break down the artificial antiquated barriers between creative and academic writing, making the writing classroom experience a more imaginative one. *Teaching Writing Creatively* features many of the most respected names in composition, instructors with long successful histories of providing teachers with functional yet inventive methods of teaching writing. The collection begins with articles that assert that all good writing must be in some important sense creative. These contributors offer accounts of the transformation of their composition classrooms, essays that demonstrate that good student writing is only marginally about genre and a critique of the creative writing workshop as a model for the composition class. Part II offers a variety of ways to approach the teaching of writing as a creative endeavor. It includes articles on helping students better understand their own writing processes and suggestions on alternative composing strategies and their classroom applications. The contributors to the final section offer a variety of new approaches to creative writing that can be successfully applied to expository writing courses as well. Student-centered and process-oriented *Teaching Writing Creatively* is a book writing instructors will find immediately useful, particularly composition instructors who feel hemmed in by the conventional expectations of writing courses and creative writing instructors looking to take advantage of the latest innovations in composition studies. **General Catalogue of the Public Library of Detroit, Mich** Detroit Public Library, 1899 **How to Study and Teach History** Burke Aaron Hinsdale, 1893
