of a child's development. The first section provides an expanded view of infancy and early childhood embracing a key theme that most young children's early music making is improvised and used to communicate with others and the self. These chapters demonstrate the importance of motherese or parentese to young children's overall development the extraordinary diversity and richness of children's early musical engagement and how this can be viewed as a resource for further learning. The second section is devoted to the learning and teaching of music during the middle years of childhood when music is often a mandated part of the school curriculum. While recognizing the enormous cultural and national differences chapters in this section give an overview of many varied and innovative forms of musical learning and teaching globally. The authors address issues related to the types of teachers who provide music instructions to children internationally how they were educated and trained and how various nations organize their curriculum in ways that provide children with access and opportunities to engage with music in the classroom. The third section focuses on the musical experiences and development of adolescents aged 12 to 18. An Introduction to School Music Teaching Karl Wilson Gehrken, 2015-06-16 Excerpt from *An Introduction to School Music Teaching* I am not attempting in this book to supply a manual of method but merely to give such general information concerning certain matters pertaining to music teaching in the public schools as both

supervisors of music and school superintendents need to acquire just now in order to clear the air. Music teaching in the public schools is assuming larger and larger proportions and it is inevitable that its rapid growth in recent years should have resulted in much misconception and in not a little costly experimentation. The causes for this are first the fact that

supervisors of music have too often been insufficiently trained along both musical and general lines and second that school superintendents and principals being themselves frequently ignorant of music have either refused to have anything to do with the subject or else have been easily led to support wrong lines of effort. A third possible explanation may be the fact that

there seems to be a popular misconception concerning music study this being based upon the assumption that music is easier than the so called standard high school subjects. I am a thorough believer in the unique educational value of music as a school subject but I am just as thoroughly convinced that it is only when properly administered that significant results will eventuate.

This does not mean that any particular method must be employed but rather that teachers must realize more definitely the

end to be accomplished through music study and must make themselves acquainted with at least such general principles of psychology and education as will enable them actually to attain this end in the case of a reasonable number of pupils About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **Contemporary Music Education** Michael L.
