Techgnosis Myth Magic And Mysticism In The Age Of Information:

Techgnosis Erik Davis,1998 From the dawn of self conscious humanity our inner life has been the province of religion and mysticism But as Erik Davis reveals as powerful as mythology and spirituality can be in illuminating our deepest selves it has largely been the successively emerging tools of our communications technologies from talking drums and papyrus scrolls to television and cyberspace that have actually reshaped the essence of who we are With keen perception Davis ranges widely from ancient Gnosticism to the worship of UFOs to uncover the myths and impulses that drive our technological culture where boundaries are dissolving between actual and virtual environments and where the edges of our selves are constantly being redrawn In TechGnosis Erik Davis uncovers the religious roots of contemporary infomania and uses his remarkable insights much as the cartographers of old used their provisional maps to probe the darkness ahead now full of cyberspace monsters and digital utopias *Believing in Bits* Simone Natale,Diana Walsh Pasulka,2020 Believing in Bits advances the idea that religious beliefs and practices have become inextricably linked to the functioning of digital media How did we come to associate things such as mindreading and spirit communications with the functioning of digital technologies How does the internet s capacity to facilitate the proliferation of beliefs blur the boundaries between what is considered fiction and fact Addressing these and similar questions the volume challenges and redefines established understandings of digital media and culture by employing the notions of belief religion and the supernatural
