Teaching As Enhancing Human Effectiveness:

Teaching as Enhancing Human Effectiveness Erskine S. Dottin, Lynne D. Miller, 1994 This work highlights the idea that teaching and learning is not a matter of possessing skills nor of being possessed by skills. Instead, human effectiveness including teaching effectiveness is the potent use of the individual's own self in which one combines one's own knowledge and sensitivity with one's own unique ways of putting it into operation so as to be helpful to others. The authors show that learning and teaching others to be human is a new way of being oneself. Contents Preface THE QUEST FOR HUMAN DEVELOPMENT Six Evaluative Criteria Erskine S. Published in 1911, this book marks one of the earliest attempts to apply psychological principles to the world of business, making it a foundational text in the field of industrial psychology. In this book, Scott explores the relationship between human behavior and business outcomes, emphasizing how understanding psychological principles can lead to more efficient management and more motivated employees. He argues that businesses can increase their productivity by tapping into the psychological drivers of human motivation, attention, and decision making. Scott examines various aspects of business operations such as advertising, management, and employee relations, and presents methods to improve them through psychological insight. He discusses how advertising can be made more effective by understanding consumer psychology, how managers can motivate their workers by appealing to their psychological needs, and how businesses can foster a work environment that maximizes human potential. One of the central themes of the book is the idea that human efficiency in business is not just about increasing the quantity of work but also improving the quality of work by aligning it with human psychology. Scott suggests that a better understanding of individual differences, motivation, and the work environment can lead to higher levels of satisfaction and performance among employees, which in turn results in greater business success. Another significant aspect of Scott's work is his focus on leadership. He identifies the importance of effective leadership in achieving organizational goals and highlights how leaders

can harness psychological principles to inspire and guide their teams According to Scott leaders who understand the psychological needs of their employees can cultivate an atmosphere of trust respect and cooperation which is essential for high productivity and morale Scott's insights are still relevant today as they offer a timeless understanding of human behavior in the context of business His work laid the groundwork for the later development of organizational psychology and human resource management practices that focus on improving the well being and efficiency of employees while driving organizational success Increasing Human Efficiency In Business is a must read for those interested in the intersection of psychology and business It is not only a critical text for students and scholars of psychology and business management but also offers practical advice for modern day entrepreneurs managers and leaders looking to improve their organizations by understanding and applying psychological principles *Increasing Human Efficiency in Business* Walter Dill

Scott,2005-01-01 We've built machines to become more efficient in business but humans remain human and inefficient But must that always be the case According to renowned business psychologist Walter Dill Scott managers can help workers find their second wind the point at which they move past their previous limits and achieve top performance Applying psychology to business Scott wrote when a man is doing what he believes to be his best he is still able to do better when he is completely exhausted he is under proper stimulus able to continue In Increasing Human Efficiency in Business Scott explores how to create motivation for success He looks at factors such as imitation competition loyalty concentration wages pleasure the love of the game relaxation and habit formation He hopes to find each worker's latent powers and hidden stores of energy to discover wider horizons of honorable and profitable activity WALTER DILL SCOTT applied psychology to the fields of advertising vocational aptitude and business He created a rating scale that would predict a job applicant's success in a given position this scale was modified for the military during World War I with great success For this contribution Scott earned a Distinguished Service Medal at the end of the war He retired as President Emeritus from Northwestern University which he led from 1920-1939 Improving Undergraduate Instruction in Psychology ,1952 *Actionable Learning* Terrence
