*Teaching Effectiveness* Madan Mohan, Ronald E. Hull, 1975      Improving Instruction Through Supervision, Evaluation, and Professional Development Michael F. DiPaola, Charles A. Wagner, 2018-01-19 This second edition updates research on instructional strategies and includes new data collection tools for classroom observations It addresses the responsibilities of principals in supervision evaluation and professional development      *Using Data to Improve Student Learning* Graham S. Maxwell, 2021-04-21 This book offers a coherent research based overview and analysis of theories and practices in using data to improve student learning It clarifies what use of data means and differentiates the different levels of decision making in education relating to the system district school classroom or individual student The relationship between data and decision making is considered and various movements in the use of data to improve student learning are analysed especially from the perspective of their assumptions and effects This leads to a focus on effective educational decision making as a social process requiring collaboration among all relevant participants It also requires a clear understanding of educational aims and these are seen to transcend what can be assessed by standardised tests The consequences of this analysis for decision processes are explored and conclusions are drawn about what principles might best guide educational practice as well as what ambiguities remain Throughout the focus is on what existing research says about each of the issues explored

*Surmounting all Odds - Vol. 1&2* Carol Camp Yeakey, Ronald D. Henderson, 2003-09-01 This text integrates the core instructional leadership tasks of all principals supervision evaluation and professional development It is a practical hands on approach based on sound theory and research      Assessing Teacher Effectiveness R. J. Campbell, 2004 How can we really evaluate teacher effectiveness Systems of teacher appraisal and evaluation are being created across the world in order to monitor and assess teacher performance But do the models used really give a fair evaluation Based on international research the authors argue that teacher effectiveness is too narrowly conceptualised and methods of measuring it are not attuned to the real contexts in which teachers work They propose a model of differential teacher effectiveness which takes into account that teachers may be more effective with some categories of students than with others teachers may be more effective with some teaching contexts than others teachers may be more effective with some subjects or components than with others Building on and developing previous research on models of teacher effectiveness and current theories the authors open up possible new debates which will be of interest to academics and researchers working in this area throughout the world
