## **Teaching Of Environmental Education:**

The Inclusion of Environmental Education in Science Teacher Education Alec Bodzin, Beth Shiner Klein, Starlin Weaver, 2010-08-13 In the coming decades the general public will be required ever more often to understand complex environmental issues evaluate proposed environmental plans and understand how individual decisions affect the environment at local to global scales Thus it is of fundamental importance to ensure that higher quality education about these ecological issues raises the environmental literacy of the general public In order to achieve this teachers need to be trained as well as classroom practice enhanced This volume focuses on the integration of environmental education into science teacher education The book begins by providing readers with foundational knowledge of environmental education as it applies to the discipline of science education It relates the historical and philosophical underpinnings of EE as well as current trends in the subject that relate to science teacher education Later chapters examine the pedagogical practices of environmental education in the context of science teacher education Case studies of environmental education teaching and learning strategies in science teacher education and instructional practices in K 12 science classrooms are included This book shares knowledge and ideas about environmental education pedagogy and serves as a reliable guide for both science teacher educators and K 12 science educators who wish to insert environmental education into science teacher education Coverage includes everything from the methods employed in summer camps to the use of podcasting as a pedagogical aid Studies have shown that schools that do manage to incorporate EE into their teaching programs demonstrate significant growth in student achievement as well as improved student behavior This text argues that the multidisciplinary nature of environmental education itself requires problem solving critical thinking and literacy skills that benefit students work right across the curriculum

**Environmental Education in a Climate of Reform** Sylvia Christine Almeida, 2015-10-29 India is grappling with serious environmental issues that have been largely sparked by its galloping economy As a measure of its seriousness to reduce the environmental impacts it has spearheaded numerous policy initiatives One of the major thrusts of the proposed initiatives to curb environmental degradation has been to create an informed and well educated citizenry The federal mandates have triggered new curriculum policies and the compulsory teaching of environmental and sustainability education at all levels in all education institutions This volume examines the policy practice conundrum It looks at how national and international policy reforms reach practitioners in this case teacher educators Furthermore it unravels how teacher educators understand environmental education the ways in which they negotiate its demands on their busy schedules what helps them in determining relevant issues within this and finally how they implement these policies in their everyday practices It is evident from this book that while there have been some really well meaning development of policies their impact on teacher educators practice and therefore student teachers learning about Environmental Education is limited The study showed that while these teacher educators had a clear understanding of the environment and saw the need importance

of incorporating Environmental Education in their daily practices they had very little scope to do so There were numerous factors that constrained implementation The book provides inputs on global policy practice gaps It offers valuable insights to a global audience grappling with understanding the ways in which environmental education policies are put into practice in emerging economies like India The final argument is thesis that while policy reforms are a step in the right direction they need to be backed up with strong implementation systems in order to be successful div **Methods Of Teaching**
