In order to write effectively, one must know the audience. In technical writing, the audience is made of mostly scientists and engineers. Given that, one must write using a scientific method. Some of the rules for writing technically are given below. Another aspect of good technical writing, and writing in general, is format. The general guidelines for formatting are also described.

When writing a new section of the paper, use headers and sub-headers. One can systematically create a table of contents by organizing the headers appropriately.

Style/Syntax

Write each paragraph, sentences should be kept short. Compound sentences are discouraged for the following reason. While writing, keep in mind that the audience is technical, but is not necessarily familiar with your work. It is a common mistake to assume that everyone else knows what you know. Therefore, long sentences, which are
