on the Southern and Western David Knapman,2018-09-30 Steam on the Southern and Western is a personal record of railway views that were captured on black and white film in the late 1950s and 1960s until the demise of steam on British Railways The style of the book is the well tried and tested picture and captions format and the majority of the pictures are black and white photography Not every picture portrays a train as there are interesting branch line and infrastructure scenes to view as well Furthermore the book is intended to represent an eclectic mix of subjects and not to solely show main line scenes for example The book covers the Southern and Western regions of British Railways with the Somerset and Dorset Railway included for good measure as it fits neatly into the areas of the country for this volume It also carries its share of photographs of British Railways standard locomotives in the locations appropriate to the regions Where preservation starts to overlap with the still active steam scene some historic photographs are included Photographs are grouped together by a particular location for example the Redhill to Reading line of the Southern and Oxford on the Western Each of these topic areas provides a flavour of the railway activity at the time Overall the book presents the reader with a gentle meander through the 1950 s and 1960 s railway scene and will stir the memories that so many of us have seen and still treasure today

Report on the Factory System of the United States United States. Census Office 10th census, 1880, Carroll Davidson Wright, 1884 Irish Steam in the 1960s Conrad Natzio, 2018-04-20 A photographic record of a time in Irish transport 1960-63 that suggests steam still reigned. It was however the end of an era. Dieselization and the move to multi purpose railcars had started but was not comprehensive. What still existed therefore was a collection of steam locomotives for the enthusiast to photograph and travel behind Steam Using Charles Augustus Smith, 1885 **Steam in the North** Richard Gaunt, 2013-08 Previously unpublished images of steam engines at work on the railways of Northern England in the 1960s. Complementing the author's previous books on steam power in the North East this book covers the Midland and West Coast main lines as well as Lancashire and Yorkshire as British Railways working steam fleet approached its end. The images look at the environment for working steam in its final months the empty fells and rainy platforms the gritty routine hard working freight as well as express passenger services. They will bring back nostalgic memories for those who remember the railway network in the 1960s but also appeal to those who enjoy dramatic scenes of the Pennines and the industrial parts of northern England The British Navy. Annual Report of the Factory Inspectors of the State of New York for the Year Ending ... New York (State). Office of Factory Inspectors, 1899 **Tales of a 1960s Steam Traveller** Ray Trader, 2006-05-01 Fill up and go will never compete with shovel and shunt. Tragically the glory days of steam are gone for good but this is an opportunity for enthusiasts and others alike to experience a golden age in British history. A lifelong devotee of the steam train Ray Trader was fortunate enough to witness the tail end of the steam era. Based in the North West he took to the rails in pursuit of the dying embers of a coal fired industrial dream. The locomotives that fuelled the birth of an industrial nation would soon succumb to the commuter age leaving a sanitised soulless world in which the once mighty steam train is merely a novelty. Join Ray on his vapour trail experiencing the romance of steam travel before the bland supremacy of crude diesel ripped the heart out of rail travel
