**Fighter Pilot's Handbook - Magic, Death and**

**Glory in the Golden Age of Flight** Gordon Thorburn, 2015-11-05 In the early days of flight no one imagined the aeroplane as a weapon of war. Inevitably the First World War proved the catalyst that was to change the face of battle for ever. But at the war's outbreak military aircraft, most of which were slow and stable two-seat biplanes, were held to have only one useful function: reconnaissance. It was not long, however, before pilots had the idea of dropping explosives from their cockpits. Once machine guns began to be fitted to aircraft, two factors immediately became clear: reconnaissance aircraft needed to be defended and enemy machines had to be attacked and destroyed. So was born the scout, as fighter aircraft were known then, to be followed before long by the aces who flew them. In this wide-ranging and extremely readable study of the fighter pilot's skills, training and experiences from the early days of flight and the development of the machines they flew, the author, who has written widely on aerial warfare, takes the reader on a journey from the first flying machines in the late nineteenth century to the development of the specialised fighter aircraft armed with one or more machine guns and capable by the war's end of speeds of 140 mph and more. Along the way he takes in the development of the devices that allowed a machine gun to fire through the propeller arc, the coming of aerial photography and airborne wireless, parachutes, engine design, test flying and problems of flight, including the dreaded spin that killed so many pilots, and the invention of aerial tactics such as the Immelmann Turn. Here too are the aces, the pilots who became famous and famed at home for their exploits at a time when newspapers were filled with ever-lengthening casualty lists from the Western Front. Some like Germany's Manfred von Richthofen, the Red Baron, Britain's James McCudden and Eddie Rickenbacker of the USA are still well known today, while others like Raymond Collishaw of the Royal Naval Air Service, France's René Fonck and Aleksandr Kazakov of the Imperial Russian Air Service are less prominent. In 1914 it was all new: this business of flying at the enemy. It is a story of creativity of machines, experiments, turning points, ebb and flow, heroes. Starting from almost nothing, the fighting men tried out their ideas and established the principles that ultimately made aircraft the most important weapon of all.
