Evolution, Creationism, and the Battle to Control America's

Classrooms Michael Berkman, Eric Plutzer, 2010-09-20 Who should decide what children are taught in school This question lies at the heart of the evolution creation wars that have become a regular feature of the US political landscape Ever since the 1925 Scopes monkey trial many have argued that the people should decide by majority rule and through political institutions others variously point to the federal courts educational experts or scientists as the ideal arbiter Berkman and Plutzer illuminate who really controls the nation s classrooms Based on their innovative survey of 926 high school biology teachers they show that the real power lies with individual educators who make critical decisions in their own classrooms Broad teacher discretion sometimes leads to excellent instruction in evolution But the authors also find evidence of strong creationist tendencies in America s public high schools More generally they find evidence of a systematic undermining of science and the scientific method in many classrooms

Techniques in Molecular Systematics and Evolution Rob DeSalle, Gonzalo Giribet, Ward Wheeler, 2013-12-01 The amount of information that can be obtained by using molecular techniques in evolution systematics and ecology has increased exponentially over the last ten years The need for more rapid and efficient methods of data acquisition and analysis is growing accordingly This manual presents some of the most important techniques for data acquisition developed over the last years The choice and justification of data analysis techniques is also an important and critical aspect of modern phylogenetic and evolutionary analysis and so a considerable part of this volume addresses this important subject The book is mainly written for students and researchers from evolutionary biology in search for methods to acquire data but also from molecular biology who might

be looking for information on how data are analyzed in an evolutionary context To aid the user information on web located sites is included wherever possible Approaches that will push the amount of information which systematics will gather in the

Nonlinear Stochastic Control and Filtering with Engineering-oriented Complexities Guoliang Wei,Zidong Wang,Wei Qian,2016-09-15 Nonlinear Stochastic Control and Filtering with Engineering oriented Complexities presents a series of control and filtering approaches for stochastic systems with traditional and emerging engineering oriented complexities The book begins with an overview of the relevant background motivation and research problems and then Discusses the robust stability and stabilization problems for a class of stochastic time delay interval systems with nonlinear disturbances Investigates the robust stabilization and H control problems for a class of stochastic time delay uncertain systems with Markovian switching and nonlinear disturbances Explores the H state estimator and H output feedback controller design issues for stochastic time delay systems with nonlinear disturbances sensor nonlinearities and Markovian jumping parameters Analyzes the H performance for a general class of nonlinear stochastic systems with time delays where the addressed systems are described by general stochastic functional differential equations Studies the filtering problem for a class of discrete time stochastic nonlinear time delay systems with missing measurement and stochastic disturbances Uses gain scheduling techniques to tackle the probability dependent control and filtering problems for time varying nonlinear systems with incomplete information Evaluates the filtering problem for a class of discrete time stochastic nonlinear networked control systems with multiple random communication delays and random packet losses Examines the filtering problem for a class of nonlinear genetic regulatory networks with state dependent stochastic disturbances and state delays Considers the H state estimation problem for a class of discrete time complex networks with probabilistic missing measurements and randomly occurring coupling delays Addresses the H synchronization control problem for a class of dynamical networks with randomly varying nonlinearities Nonlinear Stochastic Control and Filtering with Engineering oriented Complexities describes novel methodologies that can be applied extensively in lab simulations field experiments and real world engineering practices Thus this text provides a valuable reference for researchers and professionals in the signal processing and control engineering communities

characteristics of the objects described by current quantum theory and considers their relationship to space time In the
process it explicates the senses in which quantum objects may be consistently considered to have parts of which they may be
composed or into which they may be decomposed The book also demonstrates the degree to which reduction is possible in
quantum mechanics showing it to be related to the objective indefiniteness of quantum properties and the strong non local
correlations that can occur between the physical quantities of quantum subsystems Careful attention is paid to the
relationships among such property correlations physical causation probability and symmetry in quantum theory In this way
the text identifies and clarifies the conceptual grounds underlying the unique nature of many quantum phenomena *The
