The Making Of Music:

Making Music, Making Society Josep Martí, Sara Revilla, 2018-01-23 A society is the result of interacting individuals and individuals are also the result of this interaction This interaction happens through music among other factors As such music constitutes a powerful resource for symbolic interaction which constitutes the medium and substance of a culture The importance of music in a society is clearly brought to light in the role that it plays in the three basic parameters of the social logics identity social order and the need for exchange If music is so important to us it is because apart from its assigned aesthetic values it fits closely with the dynamics of each of these three different parameters These parameters which are consubstantial to the social nature of the human being constitute the core of the book as they manifest in musical practices This publication addresses important issues such as the role of music in shaping identities how music and social order are intertwined and why music is so relevant in human interaction The last part of the book explores issues related to the social application of musical research The volume brings together specialists from different academic disciplines with the same powerful starting point music is not merely something related to the social but rather a social life itself something capable of structuring the social experience
