**Do Institutions Matter?** R. Kent Weaver, Bert A. Rockman, 2010-12-01 As a stunning tide of democratization sweeps across much of the world countries must cope with increasing problems of economic development political and social integration and greater public demand of scarce resources That ability to respond effectively to these issues depends largely on the institutional choices of each of these newly democratizing countries With critics of national political institutions in the United States arguing that the American separation of powers system promotes ineffectiveness and policy deadlock many question whether these countries should emulate American institutions or choose parliamentary institutions instead The essays in this book fully examine whether parliamentary government is superior to the separation of powers system through a direct comparison of the two In addressing specific policy areas such as innovation and implementation of energy policies after the oil shocks of 1970 management of societal cleavages setting of government priorities in budgeting representation of diffuse interest in environmental policy and management of defense forces the authors define capabilities that allow governments to respond to policy problems Do Institutions Matter includes case studies that bear important evidence on when and how institutions influence government effectiveness The authors discover a widespread variation among parliamentary systems both in institutional arrangements and in governmental capabilities and find that many of the failings of policy performance commonly attributed to American political institutions are in fact widely shared among western industrial countries Moreover they show how American political institutions inhibit some government capabilities while enhancing others Changing American institutions to improve some aspects of governmental performance could hurt other widely valued capabilities The authors draw important guidelines for institutional reformers while emphasizing that institutions do have predictable risks and opportunities They caution that a balance between such risks and opportunities must first be reached before policy reformers try to change political institutions

**International Trade Negotiations and Domestic Politics** Oluf Langhelle, 2013-08-29 In spite of many years of negotiation on trade liberalization progress seems to have stalled This book explores why resistance to further market liberalization seems so strong given that the benefits are seen to outweigh the costs This volume argues that in order to understand the slow progress of World Trade Organization negotiations we need to take into consideration the intermestic character of trade politics that is the way in which international and domestic aspects of politics and policies have been woven together and become inextricably related to each other This is a general trend in our globalizing world and one that is most pronounced in

the case of trade politics and policy International Trade Negotiations and Domestic Politics therefore presents an in depth analysis of institutions ideas interests and actors in the interplay between international trade negotiations and national negotiating positions At the international level the authors focus on the multilateral negotiations within the World Trade Organization together with the plurilateral and bilateral negotiations on free trade agreements At the regional and domestic level they analyze the trade politics and policies of two established powers the European Union and the USA two rising powers China and India and a small industrialized country with an open economy Norway

**US Hegemony and the Americas** Arturo Santa-Cruz, 2019-12-06 In this book Arturo Santa Cruz advances an understanding of power as a social relationship and applies it consistently to the economic realm in United States relations with other countries of the Western Hemisphere Following the academic and popular debate on the ebb and flow of US hegemony this work centers the analysis in a critical case for the exercise of US power through its economic statecraft the Americas its historical zone of influence The rationale for the regional focus is methodological if it can be shown that Washington s sway has decreased in the area since the early 1970s when the discussion about this matter started it can be safely assumed that the same has occurred in other latitudes The analysis focuses on three regions North America Central America and South America Since each region contains countries that have at times maintained very different relationships with the United States the findings contribute to a better understanding of the practice of US power in the sub region in question adding greater variability to the overall results
