Teaching Tolkien's The Lord of the Rings and Other Works Leslie A. Donovan,2015-10-01 A philologist and medieval scholar J R R Tolkien never intended to write immensely popular literature that would challenge traditional ideas about the nature of great literature and that was worthy of study in colleges across the world He set out only to write a good story the kind of story he and his friends would enjoy reading In The Hobbit and in The Lord of the Rings Tolkien created an entire world informed by his vast knowledge of mythology languages and medieval literature In the 1960s his books unexpectedly gained cult status with a new generation of young countercultural readers Today the readership for Tolkien s absorbing secondary world filled with monsters magic adventure sacrifice and heroism continues to grow Part 1 of this volume Materials introduces instructors to the rich array of resources available for teaching Tolkien including editions and criticism of his fiction and scholarship historical material on his life and times audiovisual materials and film adaptations of his fiction The essays in part 2 Approaches help instructors introduce students to critical debates around Tolkien s work its sources its influence and its connection to ecology religion and science Contributors draw on interdisciplinary approaches to outline strategies for teaching Tolkien in a wide variety of classroom contexts Mapping Middle-earth Anahit Behrooz,2024-01-25 In this cutting edge study of Tolkien s most critically neglected maps Anahit Behrooz examines how cartography has

traditionally been bound up in facilitating power Far more than just illustrations to aid understanding of the story Tolkien's corpus of maps are crucial to understanding the broader narratives between humans and their political and environmental landscapes within his legendarium Undertaking a diegetic literary analysis of the maps as examples of Middle-earth's own cultural output Behrooz reveals a sub-created tradition of cartography that articulates specific power dynamics between mapmaker map reader and what is being mapped as well as the human/nonhuman binary that represents human's control over the natural world Mapping Middle-earth surveys how Tolkien frames cartography as an inherently political act that embodies a desire for control of that which it maps In turn it analyses harmful contemporary engagements with land that intersect with but also move beyond cartography such as environmental damage human-induced geological change and the natural and bodily costs of political violence and imperialism Using historical eco-critical and postcolonial frameworks and such theorists as Michel Foucault Donna Haraway and Edward Said this book explores Tolkien's employment of particular generic tropes including medievalism fantasy and the interplay between image and text to highlight and at times correct his contemporary socio-political epoch and its destructive relationship with the wider world
