by analyzing your market assessing your strengths and checking the available resources With a clear understanding of the situation then you set your objectives and decide the best strategies to achieve them Finally select what steps to take to implement them while calculating their costs If you manage a very small business maybe you do most of it just in your head but you need to do all of that anyway These are precisely the steps involved in marketing planning If you perform them following a controlled process and using well tested templates that is writing a real plan it is almost certain that you end up making better business decisions So why do many small and medium sized companies not use it Perhaps because they tried but did not get the benefits that they expected The main problem is usually that marketers in such companies are severely short of time To speed things up maybe they draw their plan in such a simplified way as to be hardly useful Unfortunately if you want an effective marketing plan you must write an actual marketing plan This book describes in detail the activity of a consultant who assists a small company in writing its first marketing plan work that the author has carried out over many years Reading it you can follow step by step how a real small business marketing plan is built up with a precise and clear explanation of how and why each operation is carried out At the end of the book you will find all the templates to guide the writing of a truly effective plan for improving the company s bottom line and doing it in a surprisingly short amount of time
