**Ethnomathematics** Arthur B. Powell, Marilyn Frankenstein, 1997-01-01 Presents the emerging field of ethnomathematics from a critical perspective challenging particular ways in which Eurocentrism permeates mathematics education and mathematics in general    *A Guide to Detracking Math Courses* Angela Torres, Ho Nguyen, Elizabeth Hull Barnes, Laura Wentworth, 2023-05-03 Create a pathway to equity by detracking mathematics The tracked mathematics system has been operating in US schools for decades However research demonstrates negative effects on subgroups of students by keeping them in a single math track thereby denying them access to rigorous coursework needed for college and career readiness The journey to change this involves confronting some long standing beliefs and structures in education When supported with the right structures instructional shifts coalition building and educator training and support the detracking of mathematics courses can be a primary pathway to equity The ultimate goal is to increase more students access to and achievement in higher levels of mathematics learning especially for students who are historically marginalized Based on the stories and lessons learned from the San Francisco Unified School District educators who have talked the talk and walked the walk this book provides a model for all those involved in taking on detracking efforts from policymakers and school administrators to math coaches and teachers By sharing stories of real world examples lessons learned and prompts to provoke discussion about your own context the book walks you through Designing and gaining support for a policy of detracked math courses Implementing the policy through practical shifts in scheduling curriculum professional development and coaching Supporting and improving the policy through continuous research monitoring and maintenance This book offers the big ideas that help you in your own unique journey to advance equity in your school or district's mathematics education and also provides practical information to help students in a detracked system thrive    [The Calculus Collection](#) Caren L. Diefenderfer, Roger B. Nelsen, 2010-12-31 The Calculus Collection is a useful resource for everyone who teaches calculus in high school or in a 2 or 4 year college or university It consists of 123 articles selected by a panel of six veteran high school teachers each of which was originally published in Math Horizons MAA Focus The American Mathematical Monthly The College Mathematics Journal or Mathematics Magazine The articles focus on engaging students who are meeting the core ideas of calculus for the first time The Calculus Collection is filled with insights alternate explanations of difficult ideas and suggestions for how to take a standard problem and open it up to the rich mathematical explorations available when you encourage students to dig a little deeper Some of the articles reflect an enthusiasm for bringing calculators and computers into the classroom while others consciously address themes from the calculus reform movement But most of the articles are simply interesting and timeless explorations of the mathematics encountered in a first course in calculus    [Creative Teaching: Mathematics in the Early Years and Primary Classroom](#) Mary Briggs, 2007-10-31 Creative Teaching is not only for the arts this unique and stimulating book shows how mathematics and mathematics teaching can be creative exciting and enjoyable Offering teachers a dynamic

and different perspective on mathematics it enables them to see and teach in creative ways that will develop their pupils mathematical thinking potential *Learning Vedic Mathematics on First Principles* Dr.S.K.Kapoor,2007-12

Sonne-Hansen,2004 This book is a collection of papers presented at the conference New Trends in the History and  
Philosophy of Mathematics held at the University of Roskilde Denmark 6-8 August 1998 The purpose of the meeting was to  
present some of the new ideas on the study of mathematics its character and the nature of its development During the last  
decades work in history and philosophy of mathematics has led to several new original views on mathematics Both new  
methods and angles of study have been introduced and old views of say the nature of mathematical theories and proofs have  
been challenged For instance disciplines as ethnohistorical studies of mathematics and the sociology of mathematics have  
resulted in several new insights and classical historians of mathematics are also experimenting with new perspectives In a  
similar way philosophy of mathematics has witnessed rather deep changes Classical foundational studies have been  
challenged by new broader perspectives The aim was to provide a forum within which historians of mathematics philosophers  
and mathematicians could exchange ideas and discuss different new approaches in the history and philosophy of

mathematics The book includes papers by Joan Richards Henk J M Bos Donald MacKenzie Arthur Jaffe Jody Azzouni and Paulus Gerdes It also includes an extended introduction **Annual Report of the Ontario Agricultural College and Experimental Farm, for the Year Ending 31st December** ...
