

### Improving fisheries sustainability

State agencies often have less resources than federal agencies, and data limitations represent a critical challenge to fisheries management in the United States

### Fisheries Management Index (FMI)

We applied the FMI as a tool to track and evaluate non-federal fisheries management performance, which can help managers prioritize fisheries for management attention

### Prioritization → attention → solutions

Management prioritization and partnerships with fishing communities can boost resources and management capabilities, improve data collection, close critical information gaps, and ultimately produce healthier fisheries

**60%**

of fisheries surveyed are not actively managed

**80%**

of fisheries surveyed have unknown health status

*The Management of Marine Fisheries* John A. Gulland, 1977      **Handbook of Marine Fisheries Conservation and Management** R. Quentin Grafton, 2010-01-21 This handbook is the most comprehensive and interdisciplinary work on marine conservation and fisheries management ever compiled Its many valuable contributions offer a way forward to both understanding and resolving the multifaceted problems facing the world's oceans      **The Management of Marine Fisheries** J. A. Gulland, 1974      *Sustaining Marine Fisheries* National Research Council, Commission on Geosciences, Environment, and Resources, Ocean Studies Board, Committee on Ecosystem Management for Sustainable Marine Fisheries, 1999-03-19 Fluctuations and declines in marine fish populations have caused growing concern among marine scientists fisheries managers commercial and recreational fishers and the public *Sustaining Marine Fisheries* explores the nature of marine ecosystems and the complex interacting factors that shape their productivity The book documents the condition of marine fisheries today highlighting species and geographic areas that are under particular stress Challenges to achieving sustainability are discussed and shortcomings of existing fisheries management and regulation are examined The volume calls for fisheries management to adopt a broader ecosystem perspective that encompasses all relevant environmental and human influences *Sustaining Marine Fisheries* offers new approaches to building workable fisheries management institutions improving scientific data and developing management tools The book recommends ways to change current practices that encourage overexploitation of fish resources It will be of special interest to marine policymakers and ecologists fisheries regulators and managers fisheries scientists and marine ecologists fishers and concerned individuals

*Governance of Marine Fisheries and Biodiversity Conservation* Serge M. Garcia, Jake Rice, Anthony Charles, 2014-07-15  
Governance of Marine Fisheries and Biodiversity Conservation explores governance of the world's oceans with a focus on the impacts of two inter connected but historically separate streams of governance one for fisheries the other for biodiversity conservation Chapters most co authored by leading experts from both streams investigate the interaction of these governance streams from ecological economic social and legal perspectives with emphasis on policies institutions processes and outcomes on scales from the global to the local community and with coverage of a range of themes and regions of the world The book opens with chapters setting the historical context for the two marine governance streams and framing the book's exploration of whether as the streams increasingly interact there will be merger or collision convergence or co evolution The concluding chapter synthesizes the insights from throughout the book relative to the questions posed in the opening chapters It also draws conclusions about future needs and directions in the governance of marine fisheries and biodiversity vital to the future of the world's oceans With cutting edge chapters written by many leading international experts in fisheries management and biodiversity conservation and edited by three leading figures in this crucially important subject *Governance of Marine Fisheries and Biodiversity Conservation* is an essential purchase for fisheries scientists economists resource managers and policymakers and all those working in fields of biodiversity conservation marine ecology and coastal livelihoods Libraries in all universities and research establishments where environmental and or marine studies conservation ocean policy and law biological and life sciences and fisheries management are studied and taught should have copies of this most important book

[A third assessment of global marine fisheries discards](#) Food and Agriculture Organization of the United Nations, 2019-02-19 This third update of FAO's global discard estimate adopted the fishery by fishery approach employed in the second discards assessment published in 2005 The update included publicly available discard data in the last 20 years to establish a baseline of a time series of global marine fisheries discards This is essential for monitoring the status and trends of discard management which is the first step of the ecosystem approach to fisheries management cycle In addition the study developed a new fisheries data table incorporating landings data from the FAO Global Capture Production dataset FishStat J from 2010 to 2014 which allocated the landings to over 2 000 fisheries worldwide The current study estimated that the annual discards from global marine capture fisheries between 2010 and 2014 was 9.1 million tonnes 95% CI 6.7-16.1 million tonnes About 46 percent 4.2 million tonnes of total annual discards were from bottom trawls that included otter trawls shrimp trawls pair bottom trawls twin otter trawls and beam trawls The study included a synthesis of estimates of bycatch and discards of endangered threatened and protected ETP species Substantial advances have been made in

quantifying fisheries interactions with such species so as to make informed decisions on their protection. However, many challenges remain, especially for small-scale fisheries. The development of standardized data collection techniques, risk-based sampling, and sharing of data across agencies and regions will help to identify management priorities and allow implementation and enforcement of mitigation measures. A review of previous research showed that discard practices were often related to a wide range of factors, so it is difficult to assess the effectiveness of fishery management actions on the amount and practice of discards. Many regulations are inconsistently enforced, and their implementation is often less strict than intended. Piecemeal approaches in many bycatch and discards management measures can result in unintended cross-taxa conflicts where regulations designed to reduce bycatch and/or discards of one species or species group may increase bycatch and/or discards of another. Examination of approaches to accounting for and mitigating against pre-catch, post-capture, and ghost fishing mortalities demonstrates that an understanding of the relative importance of factors affecting indirect fishing mortality is necessary for estimating total fishing-induced mortality and for designing and implementing mitigation measures.
