Subject Catalog, 1981 Library of Congress, 1981 **The Publishers' Trade List Annual** , 1991 **National Union Catalog** , Includes entries for maps and atlases *National Union Catalog, 1981* , 1982 **Manchild in the Promised Land** Claude Brown, 2012-01-03 Manchild in the Promised Land is indeed one of the most remarkable autobiographies of our time This thinly fictionalized account of Claude Brown's childhood as a hardened streetwise criminal trying to survive the toughest streets of Harlem has been heralded as the definitive account of everyday life for the first generation of African Americans raised in the Northern ghettos of the 1940s and 1950s When the book was first published in 1965 it was praised for its realistic portrayal of Harlem the children young people hardworking parents the hustlers drug dealers prostitutes and numbers runners the police the violence sex and humour The book continues to resonate generations later not only because of its fierce and dignified anger not only because the struggles of urban youth are as deeply felt today as they were in Brown's time but also because the book is affirmative and inspiring Here is the story about the one who made it the boy who kept landing on his feet and became a man **The Song of a Manchild** Durrell Owens, 2004 He's a cop he's a black man he's gay and he's about to become a mother Kelvin longs to give birth to a baby a beautiful manchild who will carry his hopes into the future **The Cumulative Book Index** , 1981 A world list of books in the English language Fiction, 1876-1983: Authors R.R. American Bookseller , 1981 The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential Books in Print , 1987 Tributes Irving Horowitz, 2017-10-19 In one of his final works Stephen Jay Gould spoke of the human race as a wildly improbable evolutionary event well within the realm of contingency Drawing on his personal knowledge of fifty figures from the world of twentieth century social science Irving Louis Horowitz offers commentaries drawn from a variety of public occasions to explain one segment of this improbable event In the process he reveals how the past century was defined in substantial measure by the rise of social research Commenting on Tributes Daniel Mahoney observes some pieces are completely authoritative and detailed others more conversational and informal That diversity of approaches tied to the special character of these people increases the readability and interest in the book as a whole In addition to illuminating the life and thought of these major figures these

essays and addresses reveal the impressive catholicity of Horowitz's concerns and his ability to remain open to the widest range of theoretical and practical approaches. In a certain sense this book is also an intellectual autobiography in the form of an expression of Horowitz's debt to intellectual interlocutors and influences over the years. As a consequence, *Tributes* will be of the greatest interest to anyone who wishes to come to terms with the intellectual formation of the people who gave substance to new ways of experiencing as well as explaining society. The book is thus a thoughtful guide to the intellectual life of our times. From Arendt and Aron to Veblen and Wildavsky, these essays take shape as a systematic mosaic of the past century. Written by a central participant in social theory, *Tributes* is both an informal guide and a formal text for readers coming upon social science innovators for the first time. The book breaks the boundaries of conventional discourse and in so doing gives voice to the outstanding figures that helped make the twentieth century the century of social research.
