ABSTRACT

Herbal drugs are being used as medicines from ancient period. The increased use of herbal drugs, and concerns over their safety and efficacy have certainly augmented the need of standardization of these herbal drugs. WHO has set up guidelines for standardization of these drugs, which are used as a standard by the majority of countries. The standardization includes the external (macroscopy/microscopy) as well as internal examination/ash values, extractive values and many other parameters to identify, authenticate and study its chemical composition. Standardization of the medicinal plants will ensure indirectly that the plants are conserved for their medicinal and nutritive value. Standardization confirms the safety of the medicinal plant but efficacy has to be judged clinically or in the laboratory. There is a thin line between efficacy and the presence of chemical compounds in the drug. The major hurdle in standardization of the batch to batch variation in the plant compounds. Addition of finer analytical methods of the chemical compounds may help to minimize the variation and give a better resolution of the plant drug. Importance of toxicological examination has increased manifolds as contamination can occurs at various stages, from collection, storage, analysis or processing to extraction of active principles. These parameters should be recorded for years together; their database should be generated, recorded and analyzed statistically to see the difference in quality and quantity of the chemical compounds.

INTRODUCTION

Medicinal plants are in use for the purpose of treatment of different ailments since centuries. There has been an immense increase in sales of herbal OTC (Over the counter drugs). This is growing to a billion dollar industry. The need for safety and efficacy has also escalated since the western interest has grown. Thus the need for standardization has come into view. The process of evaluation of the quality and purity of

crude drugs by means of various parameters like morphological, microscopical, physical, chemical and biological observations is called standardization.¹ Standardisation of the herbal drug begins from the collection of the herbal drug to its packaging/use as medicine. The impediments in standardization of herbal drugs:

- Variability in the chemical composition of the soil and changes in the climate in-

TEXT BOOK OF QUALITY CONTROL AND STANDARDIZATION OF HERBALS Dr. Rekha Tarasingh Rajput, Saurabh Khare, Dr. Vivek Srivastava, Dr. Prabhat Kumar Upadhyay, Dr. Shweta S. Saboo, 2025-04-21 The Textbook of Quality Control and Standardization of Herbals is a comprehensive guide covering the principles techniques and regulatory requirements for ensuring the quality and safety of herbal medicines. It provides essential knowledge for students, researchers and professionals in the pharmaceutical and herbal drug industries. The book begins with basic tests for pharmaceutical substances, medicinal plant materials and dosage forms along with WHO guidelines for quality control of herbal drugs. It discusses methods for evaluating commercial crude drugs intended for medicinal use. A key focus is quality assurance detailing the implementation of cGMP, GAP, GMP and GLP in the herbal drug industry. The WHO guidelines on Good Manufacturing Practices cGMP for Herbal Medicines are covered in detail. The book also includes EU and ICH guidelines for the quality control of herbal drugs, safety and efficacy research and stability testing of herbal formulations. It highlights the importance of pharmacovigilance systems for monitoring herbal medicine safety. The role of chromatographic techniques such as HPTLC, HPLC and GC in the standardization of herbal products is thoroughly explored. The book also explains the regulatory requirements for herbal medicines including new drug applications, export registration and GMP compliance. The Herbal Pharmacopoeia section compares various global pharmacopoeias and emphasizes the role of chemical and biological markers in herbal drug standardization. This book serves as a valuable resource for ensuring the authenticity, purity and consistency of herbal medicines worldwide.

Phytopharmaceuticals and Herbal Drugs Manju Rawat Singh, Deependra Singh, 2023-07-15 Phytopharmaceuticals and Herbal Drugs: Prospects and Safety Issues in the Delivery of Natural Products explores the delivery aspects of plant based drugs providing insights into formulation constraints associated with plant based drugs, the development of novel delivery systems based on polymers or lipids and how combining natural products with technological advancements in drug delivery is making large strides. Some of the best selling drugs for the treatment of diseases like cancer, ulcers and malaria are either natural products or their derivatives all of which are covered in this comprehensive resource. This book will be useful to researchers working in plant derived medicines and the development of their delivery systems including sections on their derivatives and analogs that represent over 50% of all drugs in clinical use. Active ingredients originated from plant resources generally exhibit compromised desired effects limited by issues such as stability, solubility, molecular size, bioavailability and toxicity. Includes perspectives from academic and industry research. Provides information on the safety, regulatory aspects and clinical aspects related to plant based drugs. Introduces developments of new targeted drug delivery systems.

TEXT BOOK OF HERBAL DRUG TECHNOLOGY Ms. Meena Bandiya, Dr. Sonu Sharma, Dr. Prabhat Kumar Upadhyay, Dr. Nidhi Saxena, Dr. Rajesh Kumar Sharma, 2025-05-09 The Textbook of Herbal Drug Technology is a detailed and structured guide that explores the science, tradition and modern
