The diagram illustrates a three-pronged approach to future land use planning. It begins with a central goal, 'Future Land Use Planning', which branches into three main data collection categories: Geological, Topographical, and Geophysical. Each category is supported by specific field and mapping techniques. These three streams of data converge into a single diagnostic phase, 'Environment and Subsurface Diagnosis'. This diagnosis then informs the creation of an 'Optimal Land Use Planning' strategy, which ultimately leads to the goal of 'Sustainability'.
