Supply Chain Management Based on SAP Systems Gerhard F. Knolmayer, Peter Mertens, Alexander Zeier, 2012-11-02 In recent years Supply Chain Management SCM has become one of the most widely discussed issues on top management's agenda. One essential precondition for the implementation of SCM concepts are powerful information systems. Many manufacturing companies deploy the logistics modules of the SAP R 3 system. In 1997 SAP enlarged its focus beyond Enterprise Resource Planning ERP systems and started an SCM initiative which resulted in the Advanced Planner and Optimizer APO system.

Today APO has become one of the main components of the mySAP com solutions. This book describes the principles and methods of intra and inter company SCM with reference to Release 4 6 of the SAP R 3 and to Release 3 0 of the SAP APO system. It also discusses potential future developments of these widely used software systems. The final chapter of the book contains an annotated overview of the most valuable online resources dealing with SCM.
