## **Surgical Decision Making II:**

*Surgical Decision Making* Rifat Latifi, 2016-04-30 This text provides a comprehensive and state of the art overview of the major issues specific to the surgical decision making process These include patient s anatomy and pathophysiology as well as the magnitude of the injury at hand the surgeon s own physiologic and mental status training and experience and many other factors such as creativity leadership skills and overall biochemistry of the environment The text reviews theoretical as well as objective information that surgeons use to make intraoperative decisions in situations often with very limited data decisions that will decide between a patient s living or dying such as in trauma surgery and other complex surgeries How surgeons choose one technical approach over another in these situations is covered This book fills a critical need for resource materials on these topics and includes both theoretical as well as practical presentations of many typical patients seen in operating rooms around the world *Surgical Decision Making Beyond the Evidence Based Surgery* is written by academic and clinical practicing surgeons that face intraoperative decision situations on a daily basis and therefore provides a unique and valuable resource in the field for surgeons currently in training and for those already in clinical or research practice

**Medical Decision-Making on Behalf of Young Children** Imogen Goold, Cressida Auckland, Jonathan Herring, 2020-09-17 In the wake of the Charlie Gard and Alfie Evans cases a wide ranging international conversation was started regarding alternative thresholds for intervention and the different balances that can be made in weighing up the rights and interests of the child the parent s rights and responsibilities and the role of medical professionals and the courts This collection provides a comparative perspective on these issues by bringing together analysis from a range of jurisdictions across Europe North and South America Africa and Asia Contextualising the differences and similarities and drawing out the cultural and social values that inform the approach in different countries this volume is highly valuable to scholars across jurisdictions not only to inform their own local debate on how best to navigate such cases but also to foster inter jurisdictional debate on the issues The book brings together commentators from the fields of law medical ethics and clinical medicine across the world actively drawing on the view from the clinic as well as philosophical legal and sociological perspectives on the crucial question of who should decide about the fate of a child suffering from a serious illness In doing so the collection offers comprehensive treatment of the key questions around whether the current best interests approach is still appropriate and if not what the alternatives are It engages head on with the concerns seen in both the academic and popular literature that there is a need to reconsider the orthodoxy in this area
