## **The Making Of The Common Law:**

**The Making of the Common Law** Paul Brand, 1992 England was unique among the medieval kingdoms of Western Europe. In addition to developing a system of national courts with an extensive original jurisdiction and run on quasi bureaucratic lines by royal justices it also gave birth to a single national customary law which was applicable throughout the country. This was partly the product of judicial decisions made by the royal courts and partly the product of legislation. The great formative period of the Common Law began during the reign of King Henry II but continued through to the early fourteenth century. Paul Brand possesses an unrivalled knowledge of the published and unpublished sources for this critical period. *The Making of the Common Law* brings together his essays some previously unpublished on this period. The essays on the making of the English legal system which complement his book on *The Origins of the English Legal Profession* include an important essay on Henry II and the Creation of the English Common Law and Courtroom and Schoolroom. *The Education of Lawyers in England prior to 1400* the essay which won the 1988 Donald W Sutherland Prize of the American Society for Legal History. The development of English law is discussed in a number of essays including a critical introduction to the Milsom thesis on the origins of England land law and *Lordship and Distraint in Thirteenth Century England* a major reappraisal of the balance of power between lords and tenants in this period. The Common Law was taken by settlers from England to North America and to Australasia. Its earliest venture overseas however was to Ireland. *The Making of the Common Law* includes a number of important essays on the transfer of English law and the creation of a legal system modelled on that of England in the medieval English lordship of Ireland.

**Commentaries on the Common Law** Herbert Broom, 1896 **The Common Law Tradition** George W. Liebmann, *The Common Law Tradition* examines the lives and achievements of five individuals who helped broaden the perspectives of the legal academy. Edward H. Levi, Harry Kalven Jr, Karl Llewellyn, Philip Kurland and Kenneth Culp Davis and assesses the extent to which their immediate agendas were realized. What distinguished these men is that their work was practical and rooted in the law and hence yielded concrete applications. The group's diversity, the tolerant atmosphere in which they taught and wrote and the attachment of its individual members to empirical approaches differentiate them from today's legal scholars and make their ideas of continuing importance.

**Priests of the Law** Thomas J. McSweeney, 2019-11-21 *Priests of the Law* tells the story of the first people in the history of the common law to think of themselves as legal professionals. In the middle decades of the thirteenth century a group of justices working in the English royal courts spent a great deal of time thinking and writing about what it meant to be a person who worked in the law courts. This book examines the justices who wrote the treatise known as *Bracton*. Written and re-written between the 1220s and the 1260s, *Bracton* is considered one of the great treatises of the early common law and is still occasionally cited by judges and lawyers when they want to make the case that a particular rule goes back to the beginning of the common law. This book looks to *Bracton* less for what it can tell us about the law of the thirteenth century

however than for what it can tell us about the judges who wrote it The judges who wrote Bracton Martin of Patisheall William of Raleigh and Henry of Bratton were some of the first people to work full time in England's royal courts at a time when there was no recourse to an obvious model for the legal professional They found one in an unexpected place they sought to clothe themselves in the authority and prestige of the scholarly Roman law tradition that was sweeping across Europe in the thirteenth century modelling themselves on the jurists of Roman law who were teaching in European universities In Bracton and other texts they produced the justices of the royal courts worked hard to ensure that the nascent common law tradition grew from Roman Law Through their writing this small group of people working in the courts of an island realm imagined themselves to be part of a broader European legal culture They made the case that they were not merely servants of the king they were priests of the law
