Congress. House. Committee on Energy and Commerce. Subcommittee on Oversight and Investigations, 1985 **Chinese Economy in Disequilibrium** Yining Li, 2013-11-25 Known internationally as Mr Shareholding economist Li Yining has had a transformative impact on China s economic transition most notably as an early advocate of ownership reform and in his promotion of shareholding theory By examining the interrelationship between the government enterprises and the market Chinese Economy in Disequilibrium presents an in depth discussion on the issues of resource allocation industrial structure institutional innovation and economic fluctuation in the current Chinese economy under the condition of disequilibrium Credited with developing the theory of economic disequilibrium Professor Li distinguishes two types of disequilibrium on the basis of whether or not the majority of firms in the economy are viable profit makers In Chinese Economy in Disequilibrium Professor

Li points out that not only has China's economy been in a state of disequilibrium but it also has issues with enterprises not being under budget constraint. Given the limitations of market regulation under economic disequilibrium, Professor Li advocates the reform of the enterprise system and upholds the government's leading role in the establishment of order in the socialist commodity economy. A number of measures are also proposed with the aim of facilitating the transition of China's economy from disequilibrium to equilibrium. The central theme is that the reform and transition are means to serve economic growth and social development which would eventually benefit the ordinary citizens in society. Yining Li is a Professor of Economics and Emeritus Dean of Peking University's Guanghua School of Management. He is one of China's foremost economists and the author of twenty books and numerous articles on a wide range of economic subjects including reform and development in China. He has received a number of prestigious awards and honours for his research. As the leading proponent of a market economy in China, Professor Li has had a tremendous influence on China's economic reform policy over the last three decades. He has served on the Standing Committee of the National People's Congress of China and is currently Vice Chairman of the Economic Committee of the Chinese People's Political Consultative Conference.

*Middle-Income Trap* Zhijie Zheng, 2020-09-21 This book explores the essence of the middle income trap based on two major perspectives namely economic transformation and social transformation. China has experienced high speed economic growth for nearly 40 years since the adoption of the Reform and Opening policies. However, China's economic growth has been slowing down significantly in recent years. Has China tumbled into the middle income trap? This book reveals the essence of the middle income trap is that a country's economic growth is facing a double squeeze in the middle income stage while the social structure and system are unsuitable for the new social development stage which leads to economic stagnation or recession and the aggravation of social contradictions that is the double predicament of economic transformation and social transformation. This judgment is of great value for understanding the problems encountered in the current development of China.

**The Constitution of Markets** Viktor J Vanberg,2001-06-28 This book examines the institutional dimension of markets and the rules and institutions that condition the operation of market economies **The Limits of the Market** Paul De Grauwe,2016-12-22 The old discussion of Market or State is obsolete There will always have to be a mix of market and state The only relevant question is what that mix should look like How far do we have to let the market go its own way in order to create as much welfare as possible for everyone What is the responsibility of the government in creating welfare These are difficult questions But they are also interesting questions and Paul De Grauwe analyses them in this book The desired mix of market and state is anything but easy to bring about It is a difficult and sometimes destructive process that is constantly in motion There are periods in history in which the market gains in importance During other periods the opposite occurs and government is more dominant The turning points in this pendulum swing typically seem to coincide with disruptive events that test the limits of market and state Why we experience this dynamic is an important theme in the book Will the market which today is afforded a greater and greater role due to globalization run up against its limits Or do the financial crisis and growing income inequality show that we have already reached those limits Do we have to brace ourselves for a rejection of the capitalist system Are we returning to an economy in which the government is running the show
