*Solar and Space Physics* National Research Council,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Space Studies Board,Committee on a Decadal Strategy for Solar and Space Physics (Heliophysics),2013-09-26 From the interior of the Sun to the upper atmosphere and near space environment of Earth and outward to a region far beyond Pluto where the Sun's influence wanes advances during the past decade in space physics and solar physics the disciplines NASA refers to as heliophysics have yielded spectacular insights into the phenomena that affect our home in space Solar and Space Physics from the National Research Council's NRC's Committee for a Decadal Strategy in Solar and Space Physics is the second NRC decadal survey in heliophysics Building on the research accomplishments realized during the past decade the report presents a program of basic and applied research for the period 2013 2022 that will improve scientific understanding of the mechanisms that drive the Sun's activity and the fundamental physical processes underlying near Earth plasma dynamics determine the physical interactions of Earth's atmospheric layers in the context of the connected Sun Earth system and enhance greatly the capability to provide realistic and specific forecasts of Earth's space environment that will better serve the needs of society Although the recommended program is directed primarily at NASA and the National Science Foundation for action the report also recommends actions by other federal agencies especially the parts of the National Oceanic and Atmospheric Administration charged with the day to day operational forecast of space weather In addition to the recommendations included in this summary related recommendations are presented in this report

**Plasma Physics of the Local Cosmos** National Research Council,Division on Engineering and Physical Sciences,Space Studies Board,Committee on Solar and Space Physics,2004-06-06 Solar and space physics is the study of solar system phenomena that occur in the plasma state Examples include sunspots the solar wind planetary magnetospheres radiation belts and the aurora While each is a distinct phenomenon there are commonalities among them To help define and systematize these universal aspects of the field of space physics the National Research Council was asked by NASA's Office of Space Science to provide a scientific assessment and strategy for the study of magnetized plasmas in the solar system This

report presents that assessment It covers a number of important research goals for solar and space physics The report is complementary to the NRC report The Sun to the Earth and Beyond A Decadal Research Strategy for Solar and Space Physics which presents priorities and strategies for future program activities Future Missions in Solar, Heliospheric & Space Plasma Physics Erica Rolfe,B. Battrick,1985 Heliophysics: Plasma Physics of the Local Cosmos Carolus J. Schrijver,George L. Siscoe,2009-07-09 Heliophysics is a developing scientific discipline integrating studies of the Sun s variability the surrounding heliosphere and climatic environments Over the past few centuries our understanding of how the Sun drives space weather and climate on the Earth and other planets has advanced at an ever increasing rate This volume the first in this series of three heliophysics texts integrates such diverse topics for the first time as a coherent intellectual discipline It emphasises the physical processes coupling the Sun and Earth allowing insights into the interaction of the solar wind and radiation with the Earth s magnetic field atmosphere and climate system It provides a core resource for advanced undergraduates and graduates and also constitutes a foundational reference for researchers in heliophysics astrophysics plasma physics space physics solar physics aeronomy space weather planetary science and climate science Additional online resources including lecture presentations and other teaching materials are accessible at [www.cambridge.org](http://www.cambridge.org) 9780521110617 *Encyclopedia of Physical Science and Technology* Robert A.
