Kalisky,2006 This text explains the mutual influences between the physical and dynamic processes in solids and their lasing properties It provides insight into the physics and engineering of solid state lasers by integrating information from several disciplines including solid state

physics materials science photophysics and dynamic processes in solids The text discusses approaches to developing new laser materials and includes data tables of basic parameters that can be applied to laser design Novel materials and techniques used in recent developments are also covered *Solid State Lasers and New Laser Materials* ,1992 **Solid State Lasers** Massimo Inguscio, Richard Wallenstein, 2012-12-06 This volume contains the lectures and seminars presented at the NATO Advanced Study Institute on Solid State Lasers New Developments and Applications the fifteenth course of the Europhysics School of Quantum Electronics held under the supervision of the Quantum Electronics Division of the European Physical Society The Institute was held at Elba International Physics Center Marciana Marina Elba Island Tuscany Italy August 31 September 11 1992 The Europhysics School of Quantum Electronics was started in 1970 with the aim of providing instruction for young researchers and advanced students already engaged in the area of quantum electronics or wishing to switch to this area from a different background Presently the school is under the direction of Professors F T Arecchi and M Inguscio University of Florence and Prof H Walther University of Munich and has its headquarters at the National Institute of Optics INO Florence Italy Each time the directors choose a subject of particular interest alternating fundamental topics with technological ones and ask colleagues specifically competent in a given area to take the scientific responsibility for that course *Tunable Solid-State Lasers II* Aaron B. Budgor, Leon Esterowitz, Larry G. DeShazer, 2013-06-05 In June 1984 a conference on visible and IR tunable solid state lasers was held in La Jolla California The proceedings were published as the first volume of this series Tunable Solid State Lasers The emphasis of this meeting focused on discerning unified themes in the generic areas of Laser host dopant identification and growth procedures Theoretical analysis to elucidate fundamental tunable laser principles Experimental investigations on laser spectroscopy to which theoretical analyses and models can be anchored and Auxiliary technology developments in efficient laser pumping sources diodes flashlamps Subsequent to the La Jolla conference two topical meetings were held co sponsored by the Lasers and Electro Optics Society of the Institute of Electrical and Electronics Engineers and the Optical Society of America OSA The contents of Tunable Solid State Lasers II comprise the proceedings of the second of these two held at Rippling River Resort Zigzag Oregon June 4 6 1986 In addition to the four areas of attention in the La Jolla meeting papers on color center and new rare earth lasers and on nonlinear frequency shifting were also given In a fashion similar to the previous meetings the informal atmosphere of the conference and meeting site was conducive to constructive interaction among the attendees A total of 54 papers were scheduled for presentation 20 of which were invited and 34 contributed
