the early 2000s Donald MacKenzie draws particular attention to the importance of what he deems the material political economy of twenty first century finance Fast transmission of price data used to involve fibre optic cables but the strands in such cables are made of materials usually a specialised form of glass which slow light down to around two thirds of its speed in free space By contrast microwave and other wireless signals used in HFT travel through the atmosphere at nearly full light speed At these nanosecond speeds the physical nature of information transmission and the precise spatial location of the equipment involved become hugely important thus creating inevitable pinch points in the system MacKenzie details the ways in which these pinch points individual frequency bands specific locations on the roofs of computer data centres and particular sites for microwave towers are especially advantageous making it possible for those who control them to profit from that control The book draws from over 300 interviews conducted with high frequency traders around the world the people who supply them with technological systems and communication links exchange staff and regulators as well as with others who function within markets that have not yet become dominated by HFT MacKenzie focuses most closely upon the four main sites of international HFT Chicago New York Amsterdam and London and examines both the technology and the politics underpinning modern financial markets Provided by publisher *Unconventional Success* David F.

Swensen,2005-08-09 The bestselling author of *Pioneering Portfolio Management* the definitive template for institutional fund management returns with a book that shows individual investors how to manage their financial assets In *Unconventional Success* investment legend David F Swensen offers incontrovertible evidence that the for profit mutual fund industry consistently fails the average investor From excessive management fees to the frequent churning of portfolios the relentless pursuit of profits by mutual fund management companies harms individual clients Perhaps most destructive of all are the hidden schemes that limit investor choice and reduce returns including pay to play product placement fees stale price trading scams soft dollar kickbacks and 12b 1 distribution charges Even if investors manage to emerge unscathed from an encounter with the profit seeking mutual fund industry individuals face the likelihood of self inflicted pain The common practice of selling losers and buying winners and doing both too often damages portfolio returns and increases tax liabilities delivering a one two punch to investor aspirations In short Nearly insurmountable hurdles confront ordinary investors Swensen s solution A contrarian investment alternative that promotes well diversified equity oriented market mimicking portfolios that reward investors who exhibit the courage to stay the course Swensen suggests implementing his nonconformist proposal with investor friendly not for profit investment companies such as Vanguard and TIAA CREF By avoiding actively managed funds and employing client oriented mutual fund managers investors create the preconditions for investment success Bottom line *Unconventional Success* provides the guidance and financial know how for improving the personal investor s financial future **Federal Register** ,2012-03 **SEC Docket** United States.
